Since Player’s Pulse expanded to three pages in Volume 80, we’ve received lots more mail. Here are just a few of the many fine messages we’ve received by both snail mail and E-mail.

**Out of This World!**
My initial thought when I read Volume 79 was HOT DANG! Of course the first thing I checked out was the first look at the NU 64 controller. Sweet glory of heaven! The controller is standard-breaking, so tremendously beautiful, it just brings tears to my eyes. Excuse me while I get a tissue. O.K., I’m back. Besides the controller, the unit itself is pure immaculacy. The designers had the serious gamer in mind when they thought of this. Four controller ports! No more adapters! Oh, but we all know that Nintendo’s employees never thought this up. Only, and I mean only superior beings from parallel dimensions could have the ultimate intelligence to create a marvel like this. All hail!! The gift from the gaming dimension has arrived! Don’t get me wrong, I’m sure your designers are the best in the world, but please be honest. A system like this with its stellar appearance and dynamic inside is a sure sign that there really is intelligent life out there.

**Gear and Gizmos**
I think there is a largely untapped audience in the field of enhancement devices for your systems. Just think of it, Nintendo light pens, Nintendo steering wheels and pedals and Nintendo trackballs.

Hunter Davis
Williams, Indiana

Our Research and Development whizzes brainstorms just like you, Hunter. Did you know they once invented a device that could turn the NES into a knitting machine? Needless to say, many of these wilder ideas never make it off the drawing board!

**See Mario, See Mario Run!**
This may sound a bit weird, but when I was young I taught myself to read with Nintendo Power. I would shy away from other books and refuse to read them. Even when my mom read to me, instead of hearing a nursery rhyme it would be the Mega Man reviews. I am currently the top reader and writer in my school, but I couldn’t have done it without you.

**Electrifying Mail**
I really like your new letters section. I’m not sure how many people write to you on E-mail, but please consider those letters just as much as you do the ones you get via snail mail.

Dan Hagedus
via the Internet

Thanks for the compliment, Ryan. Some of us mere mortals think that the NCL design team and creative game geniuses like Shigeru Miyamoto who gave us the Mario games and helped design the Nintendo 64 controller are other-worldly.

X-iting Mail
I think your new changes are great, especially those in Player's Pulse, but I think you should start a section for cool Internet and X-Band letters like this one. Keep up the good work

She's Got Nintendo fever
A little ways back my mother was hypnotized by EarthBound and now she's reading Nintendo Power. When I come home from school it's not unusual for me to see her playing my Super NES! Anyway I thought I'd better consult a Nintendo expert. Is there some disease that makes people suddenly want to play Nintendo?

Make It a Mag!
I'm writing about Epic Center. There's nothing wrong with it except that it needs to have its own magazine! Then you'd be able to make the reviews, previews, strategies and everything else longer. I would subscribe!

Player's Poll Winner says
"My, oh Maya!"

Volume 67 Grand Prize Winner James Zempel of Spirit Lake, Iowa, collected Actrision's Pitfall! The Mayan Adventure for his Super NES, then jetted off to tropical Mexico for a bit of Mayan adventure of his own. James soaked up the rays at Cancún, dove into the warm Caribbean surf and dashed off to Chichén Itzá for some serious exploration of the ancient temples and pyramids. Jungle fever, anyone?

In Epic Ecstasy
I just ordered a subscription to Nintendo Power and received a free Chrono Trigger Player's Guide. I am amazed at how inexpensive it all was! In a time when everything seems to be escalating in price, you have kept your magazine and guides affordable. I am especially pleased with what you have done with Epic Center. It is the biggest reason I switched my subscriptions from other game magazines to Nintendo Power. I only wish you would expand it.

Pak Watch, Pak Watch,
Rah, Rah, Rah!
Now I'm not telling you how to run a magazine, but this Epic Center, it's too long, too boring! A lot of my friends just bypass the section I know you have to touch base with every gamer, but please make it shorter! If anything, you should make the Pak Watch section bigger. It's one thing I wait for every month. Nintendo, you have a great magazine. But you do have a few glitches that need to be fine-tuned to rise above the mass of Game Pros and EGMs (even though those mags cost big bucks)!

I absolutely love the cards you put in several times a year! Especially the Donkey Kong Country 2 cards in Volume 79. My brother and I laughed when we read that Rambi's favorite movie is Speed!

A Killer Site on the World Wide Web
Hi... first I want to say that your Killer Instinct 2 site on the World Wide Web is really really great. But there are still a few things that bug me. It's missing pictures of Sabrewulf, Spinal and Orchid. And why do you not show the graphics in 16-million-color JPEG format instead of 256-color GIF?

Scott via the Internet

The developers at Rare Ltd. were still working on the new-look Sabrewulf, Spinal and Orchid when we went on-line with the KI 2 site. Pictures of these missing fighters are on the Web site now. Go to http://www.nintendo.com and click on "What's New". As for the graphics formats. GIF is standard for Web sites. Virtually any PC with a VGA board or Mac can download a GIF graphic. Some users, though, might have trouble downloading JPEG graphics. And we want to give as many players as possible the opportunity to see what's hot!

IT'S ON FIRE!

You'll be the one "on fire" when you see the awesome array of options that will let you make your game as mild or as wild as you wish. You can set the shot and game clocks, activate Tag and Juice Modes, adjust the intelligence level of the computer-controlled players, and more! There's even a special Power-Up mode that sprinkles super-power icons at random around the court. Before you can say, "Final Four," you'll be flying through the air with the greatest of ease and making the biggest monster jams in college history!

FOUR SLAMMIN' PLAY MODES

No matter how you like your hoops, chances are you'll find a play mode that will satisfy your craving for full court presses and board-breaking jams. Want to rock somebody's world just once? Head-to-Head mode sets you up for a single-game showdown. If you're not afraid of a little competition, Semi-Finals mode allows up to four players to take their teams downtown for an end-of-season pay-off, while Tournament mode lets up to sixteen players grab a piece of the action. If solo style is more your speed, the Season mode allows you to guide your chosen hoopsters through a twenty-team qualifying ladder and a sixteen-team championship. Hot Spots and power-ups are disabled in this mode, so you'll better be ready to win or lose all by your lonesome!
College Slam brings together 40 teams from across the U.S., but not everyone is all-star material, so scan the stats before you pick your players. If you don’t like what you see, you can edit players’ stats in nine performance categories. Some players even have extra performance points you can draw from.

**Alabama Crimson Tide**

The Crimson Tide has some good Power stats, but don’t expect them to walk the Walk or come through in the Clutch. If you want to edit them, try beefing up their Passing and Speed stats, just to give them a more balanced game. They have lots of performance points in reserve.

**Arizona Wildcats**

The Wildcats have no extra performance points to draw from, so you’ll have to make do with what they have. They have a good balance of skills overall, but Blocking is a big weak point for them. They’re a good, solid team, but don’t expect anything spectacular.

**Arkansas Razorbacks**

Watch out, or the Razorbacks will run right over you! They already have great Power, and while they’re not exactly powerhouses in the other categories, most team members have extra performance points they can draw from. Try increasing their Speed to match their Power stats.

**Boston College Eagles**

The Power Forward, Small Forward and Point Guard are the picks of the fine crop on this team. Pass the Power Forward with either of the other two players, the Small Forward or the Point Guard may lose steam by the half, but the Power Forward can usually go the distance.

**Cal. Berkeley Golden Bears**

The Golden Bears are an extremely well-rounded team. Their Speed, Power and Dunking ability can make up for some small deficiencies in Stealing and Blocking and may be able to help them avoid situations where they’ll have to battle it out for possession of the ball.

**Cincinnati Bearcats**

Cincinnati has made some fine showings in recent years, and this is reflected in the team’s stats. Though they’re not outstanding in any one category, all team members have better than average scores in several areas. With the right substituting, the team could go far.

**FRAT CATS EXTRA TEAM CODE**

Here’s a code that will add eight fraternin’ fraternity teams to the lineup. On the title screen, press Up, Down, Left, Right, Up, Down, Left and Right on the Control Pad. If the code is entered correctly, you’ll hear a tone. You will then be able to select from the following fraternity teams in the Head-to-Head, Semi-Final and Tournament Modes.

- **Kappa Sigma**
- **Lambda Chi Alpha**
- **Phi Kappa Alpha**
- **Sigma Alpha Epsilon**
- **Sigma Chi**
- **Sigma Mu**
- **Sigma Epsilon**
- **Daytona Beach**
- **Palm Springs**
Connecticut Huskies

Connecticut's Small Forward is the undisputed star Husky, with superior performance ratings almost across the board. One man does not a team make, however, and you'd do well to pair him with either the Shooting Guard or the Point Guard, though the latter will tire easily.

Duke Blue Devils

The Blue Devils are perennial favorites at the Final Four, taking back-to-back championships in '91 and '92. Though each team member seems to have a couple categories in which they're sorely lacking, you can usually find another player who will more than make up the difference.

Florida Gators

This is another workhorse team that will do quite well with the proper adding, but if you go with the default stats, you'll have to manage them carefully. You don't want to let your opponents get too much of a lead, or you may not have enough Power to close the gap.

Georgetown Hoyas

Over the years, the Hoyas have sent a number of team members on to the pros, and there are several likely candidates on this roster. There are no mediocre players on this team, and no performance holes that couldn't be plugged with some judicious pairings on the court.

FSU Seminoles

The Seminoles are a middle-of-the-road team that could go far with the right coaching. The Shooting Guard, with his strong Speed, Steal and 3-Point ratings, should be the cornerstone of any strategic plans. The Small Forward is the only weak link in this chain of solid players.

Georgia Bulldogs

This Southeastern Conference team has its share of strengths and weaknesses, but the disparity between the high and low numbers are more misleading than what you might find on some of the other teams. Use the Center only if you need him for a short substitution.

Georgia Tech Yellow Jackets

The Yellow Jackets are big on Speed and Passing, and not bad in the Clutch play department, either. This is good, since their Power won't carry them very far. The trick will be to strike hard and fast in the early part of each half then hope the cushion carries you to the buzzer.

HEAD-TO-HEAD

Wont to trample the Tar Heels, dazzle the Blue Devils or whip the Wolverines? With the selection of teams in College Slam, you'll be able to experience for yourself the excitement of some classic court matchups. This is the only play mode that will let up to four human players participate in a single game, and any positions not activated by a controller before the game starts will be controlled by the computer.

SEMI-FINALS

Here's where the action starts to heat up as up to four players vie for the championship. Each player enters his or her initials and picks a team before the first game begins. If there are fewer than four players, the computer will pick teams at random to round out the tournament. If all human-controlled teams are knocked out before the final game, the tournament will end without a winner.

NINTENDO POWER
Here's another solid team. There are a lot of potential pairings among these five players, with many of above average scores across the board. Remember that versatility may be just as effective as virtuosity on the long road to the playoffs.

Kansas Jayhawks

There are few teams in college basketball history that can compare to the Wildcats, and they are as formidable as ever in their video game incarnation. They are equally adept in all of the categories, and you'll get a fine performance no matter which of the players you choose.

Kentucky Wildcats

There are few teams in college basketball history that can compare to the Wildcats, and they are as formidable as ever in their video game incarnation. They are equally adept in all of the categories, and you'll get a fine performance no matter which of the players you choose.

LSU Tigers

Maryland Terrapins

This Atlantic Coast Conference team possesses a style that belies its slow but steady pace. Combined with their impressive Power and Dunking abilities, the Terrapins have the ability to stay ahead of their opponents and score before they can even set up a defense.
Though the Tigers have pretty good performance numbers, it will take some careful nurturing to guide them successfully through any lengthy tournament or season play. They could probably make it to a playoff spot, but a championship crown might be beyond their reach.

The Michigan Wolverines have been to the Final Four before, and there's no doubt that they could do it again. Power is their strongest suit, with Blocking and Dunking coming in right behind. Keep your players moving and get in your opponents' faces whenever you can.

Johnson's old team made it to the NCAA tournament in '90, '91, '92, and '94, and it will be up to you to make sure that they make it one more time. The Spartans have a deficit in the Speed department, but you should be able to compensate with their Blocking skills.

The strongest player on this team (with a special emphasis on Blocking and Dunking) is the Power Forward the Center. The Small Forward and the Shooting Guard are skilled at Stealing and Blocking, but with their lower Speed, you'll have to plan your moves carefully.

With their record and stats, the Tar Heels will be one of the first teams to be picked in any tournament play. There's not a bad player in the bunch, and it would be difficult to find a better balanced team. Even the slow-running Center scores high in Power, Dunking, and Blocking.

TOU RNEY TIME

Up to sixteen players can participate in a tournament, and with the number of good teams available, the outcome is definitely not assured! Each player will be asked to enter his or her initials and to pick a team. After the last player has chosen a team and the computer prompts you for another set of initials, just highlight the "Finished" option and press A. If there are fewer than sixteen players, the computer will randomize the schedule. This is a straight tournament format, with no second chances. If all the human players are knocked out, the computer will determine a winner and display the tournament results.

1995 CONSECUTIVE TOURNAMENT APPEARANCES

1. Kansas (Tied for 6th place in NCAA records)
2. Oklahoma State (Tied for 8th place in NCAA records)
3. Missouri (4 times since 1987, and maybe you're just the one to take them all the way to the NCAA finals. You'll have to rely mostly on defense with this team, especially since Blocking and Stealing are not their strong points.)
NC State Wolfpack

The fastest runners on this team also have the least endurance, so juggle your roster carefully to keep the Wolfpack in the running. Your best bet will be to pair the Power Forward and the Point Guard in one half and the Small Forward and the Shooting Guard in the other.

Penn State Nittany Lions

Here's another example of a team having a great amount of potential but needing a bit of editing to make them really effective on the court. The Lions have two very powerful 3-Point punters, but they lack the other strengths necessary to take advantage of these skills.

Oklahoma State Cowboys

The Cowboys have done their alma mater proud, making it to NCAA tournament play four years in a row (starting in '91), and it's easy to see why. This team's Power is tremendous, giving you a low injury rate and letting you keep a successful pair on the boards for a long time.

Nebraska Corn Huskers

Opponents will have to keep an eye on your Corn Huskers, because if you have half a mind to, you can take possession of the ball with alarming regularity. Not surprisingly, Blocking and Stealing are the Huskers' strong suits, and they perform well in the Clutch, too.

Ohio State Buckeyes

The Buckeyes will demand a certain amount of finesse from you. While their stats are good overall, they lack strong Dunks, and they tend to miss more 3-Pointers than they hit. You'll have to drive inside your opponent's defenses and take shots close to the basket.

Oklahoma Sooners

If you like a running game, then you could do worse than to pick the Sooners. They have three strong runners, which is rare in this game. Their endurance could be better, but since there are three of them, you'll have more options for substitutions when things start to slow down.

WINNING STREAK

NCAA Tournament Games Won

1. Kansas State 27
   (Ranked 5th in NCAA records)
2. Oklahoma State 25
   (Twelve were won before 1955)
3. Oklahoma 20
4. Missouri 13
5. Texas 13
6. Colorado 8
7. Iowa State 5

9. Texas A&M 3
10. Texas Tech 3

NCAA Consecutive Tournament Games Won

1. Oklahoma State 8

2. Kansas 7
   (Occurred twice)
3. Oklahoma 5
4. Kansas State 3
   (Occurred three times)
5. Missouri 3
6. Texas 3
7. Colorado 2
8. Iowa State 2
9. Texas A&M 2
10. Texas Tech 2
Texas Longhorns

The Longhorns don't truly excel in any particular performance category, but everyone has a good mix of abilities, which is probably why they've made it to five of the last six NCAA championships. They're a solid team that would have a good chance in any tournament challenge.

Purdue Boilermakers

Though the Boilermakers aren't the fastest players around, they've got enough Power to sustain them through some rough play. You can thus afford to get into your opponents' faces and try to block their shots, which is another one of the Boilermakers' strengths.

St. John's Red Storms

The Red Storms want for nothing as their starting record will attest. None of the players performance totals are below 40 and the Small Forward has an astounding 60 points! This aptly named squad will lend itself to any offensive or defensive strategy you care to devise.

Syracuse Orangemen

This is one team that you might want to try hitting a few three-pointers with. They've got enough Speed and Power to support their 3-Point stats, which is just what you'll need to break away quick and get in position before a defender can get in your face and spoil your shot.

UCLA Bruins

The only weak spot in the Bruins' stats is a curious deficiency in 3-Point ability. Otherwise, there are a number of excellent pairings on this team, with all sorts of offensive and defensive possibilities. Their ability to pull off a Clutch play is especially impressive.

NINTENDO POWER
The Runnin' Rebels have done well for themselves recently, and as their nickname suggests, you should probably plan your strategy around a running game. If you utilize their Stealing, Passing, and Dunking abilities to the fullest, you may have a hard time completing plays.

You'll want to plan most of your strategies around the Center, Shooting Guard and Small Forward. The Power Forward and Point Guard are not bad players overall, but the former is a bit too slow and the latter tries too easily to rely on for long periods of time.

You'll never know what to expect next!

The Demon Deacons don't have especially good Power or Clutch ratings, yet they often make a few surprising plays late in the game. Though most of their stats are above average at best, the players seem to work off each other's strengths very well.

The Badgers' default stats are liberally sprinkled with ones, so you'll need to use their extra performance points if you want to bring them anywhere near a championship tourney. Speed and Blocking seem to be the things they've got going for them, but that's not saying much.
When you get the itch for hopping action, scratch it with GameTek's Frantic Flea Flea for Your Life!

A flea named Frantic stumbles into a machine that transforms him into Super Flea! Now, it's up to Frantic to save Fleaworld from the Insideo Invaders. He has a spin attack, a gas attack, and a whole lot of arms, but 16 stages of alien infestation may be the ultimate test.
Frantic flies into a laboratory where he finds fiendish experiments to subjugate flea-kind. Electrical zappers keep Frantic hopping for his life while Insiders try to collar the escaped Minifleas. You'll learn the basics of flea survival, collecting up to 28% of your little buddies.

**DROP ON IN**

This ledge is on the left side of 1-2, directly below the line. Frantic will end up in limbo, so watch the ledge, and on a ledge below.

PREPARE TO DROP ON IN

Use Frantic's spin attack repeatedly to bash the glass and free the Minifleas. Once the little guys escape, go below to collect them.

**STikKO HILLS**

Things get turned upside down, or at least sideways, in the Stikko Hills. Stikko paddles force Frantic to walk vertically and the change of control functions may mess with your mind. Many Minifleas must be rescued from Insiders while Insiders jump and hop everywhere.

**BREAK OUT**

Miserable Minifleas pass through the glass bulb on their way to a terrible fate unless Frantic frees them in time.

Collect your limit of minifleas, then head for the exit.

The question is, how can you get to the 1-Up on the other side of the rock wall? The answer is simple, duck down and walk through.

**TO FLEA, OR NOT TO FLEA**

At the start of Stage 2-1, Frantic leaps into the jaw of the Stikko paddles. Frantic to reach the exit door. Once you are on the left ledge, then a double jump to the zapper.

The leap from the left ledge ends up in limbo, so watch the ledge, and on a ledge below.

The leap from the right side of the stage, go to the bottom and crouch down to pass under the rock wall.

Once you reach the right side of the stage, go to the bottom and crouch down to pass under the rock wall.
Collecting 40% or more of the Minifleas in the three stages of the Boing Central won't be easy, but Frantic gets some elevated help from the Hoverpod. Once you hop aboard, you'll experience the thrill of flying between the Boing Balloons and dodging aerial mines. Come fly the Frantic skies!

**FLEA CIRCUITS**

Hovering Insides become a pain in the antennae for Frantic when he jumps from ledge to ledge. In areas like the one shown here, you have to bounce on the trampoline to reach the upper levels while avoiding the flying foes.

**MANIC MOUNTAINS**

The ice-coated Mountains of Manik mean major misery for Frantic and his friends. Expect vertical hopping and plenty of Insideas in their flying machines piloting hoverpods of their own. You'll also find Painpods aplenty. Frantic must live up to his name and dash through the stages.

**THE FLEA FEVER!**

When you get the itch to hover in stage 3-2, go to the far left and leap off into space. The Hoverpod waits patiently for Frantic at the side of the screen.

**CRISPY CRITTER**

In Stage 3-3, you'll have to charge through the zappers using your dash move unless you want to join the power grid. Push the dash button right at the start.

**FLEA PAPER**

Frantic must stick to his resolve and use his Stikko Pad if he wants to reach the 1-Up at the top of 4-3. Dash and jump to the Stikko Pad, then jump to the left ledge and crawl through the gap.

Watch out for approaching Insideas in their flying machines when you jump up to higher levels.

Use your Dash move and a jump to reach the Stikko Pad. From there, it's an easy hop to the 1-Up.
The slightest touch from one of these massive spikes will send Frantic to the flea showers.

Don't believe everything you read. These inside signs in Stage 5-3 point out the wrong way to go. Explore the maze on your own, taking extra care not to puncture your hoverpod on the spikes. The exit lies on the lower path below the sign.

The spikes in Stage 5-3 and beyond take many forms. The worst of them appear and disappear from holes Frantic can't make blind jumps as in earlier stages because there may be a bed of thorns waiting below. Jump with caution and dash through doors!

The final and most flea-ocious challenge for Frantic comes inside the invasion ships of the Destruktokon fleet. He must collect more than 60% of the Minifleas in each stage while dodging more Insideo than ever before. It's always funk for Miniflea gathering grounds.

You Got Fleas!

Work hard for Insideos patrolling the paths above. Frantic must leap between multiple paths throughout the invasion stages and face the threat of jumping blindly into danger.

After clearing the alien ship, only one task remains. Frantic must break into the offices where minions of Minifleas have been held since the beginning of the invasion.
The hunt is on for buried treasure! The long-lost hoard from a Spanish galleon lies buried on mysterious Cutthroat Island. Morgan Adams, the gutsy daughter of a notorious pirate, is determined to grab the gold, but to recover it, she'll need to find three pieces of the map to Cutthroat Island. Acclaim's 16-meg, 11-stage side-scrolling game delivers scads of swordplay. Realistic sprites, the exotic setting and an exceptionally strong story line more than make up for the simple game play and irksome lack of a password feature.

High-born William Shaw has given up a life of ease for one of adventure in His Majesty's Royal Island Colony of Jamaica. Arrested for theft, the swashbuckling scholar finds himself breaking rocks in prison as he awaits being sold into slavery! The time he spent at university studying Latin is about to save his roguish neck, though. Needing Shaw's help to translate a piece of the map to Cutthroat Island, Morgan Adams breaks into the big house to break Shaw out!
RUSH TO THE GOLD

Morgan starts out with one piece of the treasure map. Team up with dashing rogue William Shaw, she'll have to find the other two pieces before setting sail on the Morning Star for Cutthroat Island. Unfortunately, colonial Caribbean is thick with scoundrels who have their own designs on the loot! None is meaner than Dawg Brown, who's made many a man walk the plank. Dawg's cohorts in crime are the traveling Snelgrave and the corrupt Governor Ainslee.

EXCLUSIVE!
LOCATIONS OF 4 TREASURE CHESTS REVEALED

PAIR UP YOUR PARTNERS
battle to the booty alone or double your fencing fun by plugging a second controller into your Super NES and fighting with a friend. In two-player mode, take special care when you reach the quarry. Steer with the quarry cart will require close teamwork. When fighting, the hero and heroine can't hurt each other, even by accident.

GUARDS! STOP THEM!
Enemies with rapiers will try to draw to a short range. A sharp edge. Unfortunately, they're not particularly nimble. Leaves plenty of time to jump on them and swing away. In a larger environment with many obstacles, try to lure a lone guard into a tight corner where

THE UNIDIRECTIONAL STAR
PRESS X & N

When you complete certain stages, you'll get dazzling new moves. You can execute those only if you land enough hits to cause your Aggression Indicator in the upper left-hand corner of the screen to fill.

In the heat of battle, Morgan will hold on to a knife that she's picked up, while William can throw it with deadly force if you press the X button and toward.

The Warden hacks with his halberd blade, then fires at you when you retreat. If you knock him into this corner, though, you can defeat him without suffering a scratch yourself.
QUARRY CART

With Redcoats in hot pursuit, our heroine and hero leap into a mining cart for a wild trip! Because you can’t control the cart’s speed, you’ll need split-second timing to dodge the trees, boulders and big bruisers. Slam into the Redcoats to gain frequent-fugitive points. Refer to the directions below for a safe and worry-free trip.

TRACKING THROUGH THE QUARRY

TOP-ROCK. DOWN-TREE-TREE-ROCK. TOP-BIG ENEMY. DOWN-ROCK. TOP-ROCK. DOWN-TREE. TOP-BIG ENEMY. DOWN-TREE. TOP-ROCK. ROCK-BIG ENEMY. DOWN-ROCK-END.

SPITTALFIELD

Many a mangy sea dog and ruthless highwayman has taken up residence in this hard-bitten hamlet on the Spanish Main. Skilled in sword-to-sword combat, these rogues won’t give up as easily as the Redcoats did. Use any means necessary to make it to the tavern run by Morgan’s Uncle Mordechai, who holds the remaining piece of the map. Unfortunately, Dawg Brown and his henchman, Snelgrave, have dropped in to swell some grog!

WINNING A 1-UP

After picking up the treasure chest, clean the scurvy squatters out of the nearby sail shop to make a 1-up appear. Head down the mean street to the bottle shop, where you can pick up a 1-up, then fight the blowhard glassblowers on your way out. In both places, your little enemies can drain a lot of energy with their quicksilver attacks. Try grabbing them and tossing them over your head.
Crouch and stab up at Uncle Mordechai until he cries "uncle" and drops the third piece of the map.

**Sword Hoard**

After you pick up the bomb, your first stop in Spitfield should be the blacksmith's shop. Toss the bomb at the first big smithy you see, then grab a sword and fight for your life! Use your bidirectional stab when enemies surround you.

**Points to Victory**

A steady stream of villains will attack you in Spitfield. Keep beating them. When you rack up 100 points, you'll earn a Continue, good for six new lives if you ever cash out your Energy Meter. If the action gets a little too hectic, skip into a back alley or shop. When you return, the coast will be clear, at least for a little while.

**Tavern Trouble**

Grab the first big brawler, then dash the remaining runaways with the sword. Don't use the pistol, because you'll lose the upturned alegrave. Avoid picking up the blood, because then you'll have a real problem. When you grab a runaway near the left side of the entrance in Spitfield:

- Keep attacking your foes, even when they've disappeared off the side of the screen.
- If the tailor's shop, grab the knife, then replenish your energy with a swim from the medicine bottle.
Having grabbed the precious third piece of the map, Morgan and William have outraged Governor Ainslee, a lowlife in high office. The knavish governor sends his Redcoats in hot pursuit, but he hasn't counted on the resourceful rogues leaping aboard a passing carriage! You'll have to dodge cannonballs and flagpoles while fending off the rapscallions who are trying to win the hefty bounty on your head. As the carriage plods along, one false step could end your pirate career—forever!

After you leap off the high-speed carriage, it's only a few short steps to the dock where your pirate ship lies at anchor. Before you can join your crew aboard the Morning Star, though, you'll have to pay a social call on the Harbormaster. A bribe would normally work wonders with the corrupt flunky, but he has greedy eyes on the big reward that Governor Ainslee has put on your head.

Long experience taming the toughs of the Spanish Main has made the Harbormaster a formidable opponent. He's learned the fighting techniques of brigands from the sea to Baja California. Think you can retreat? He'll shoot you with his rifle and slash at you with his halberd. Get too close, and he'll dive in for some mano-a-mano combat!
SLIDE AS YOU RIDE
To avoid the green dagpoles, duck and slide by pressing Down, Toward and the Y Button. If you want to live dangerously, you can jump over the lower poles as shown in the map. Be warned, though, that jumping increases your chances of falling to the rocky pavement. With so much going on, don’t try to impress onlookers with your flashy swordplay. Whenever a bounty hunter drops on the carriage roof, knock him off with a slide kick.

CUTTHROAT ISLAND

CANNONBALL RUN
Anchored in the harbor, His Majesty’s warships are taking target practice at you. Avoid the cannonballs by moving left and right. If you move away, you may lose your head! When a bounty hunter leaps aboard, duck and run left. Remember, jumping increases your risk of injury.

MORNING STAR MUTINY
There’s no honor among pirates. That’s a lesson Mr. Morgan and William are about to learn the hard way! While Morgan was away, Jackass and the rest of the crew members, Scully’s skullduggery is about to bear deadly fruit as the Morning Star mutinies!

ALL HANDS ON DECK!
With no place to run and hide, you’ll have no choice but to leap into the frenzied fray on the main deck! Watch out for the peg-legged pirate. He’d love to take a swipe at you with his hook! If you finish your enemies quickly, you’ll have plenty of lives left for searching Cutthroat Island.

Surrounded? Back up to the doorway so you’ll have to face mutineers on only one side.
THE JUNGLE

The three map pieces have led you to the long-lost land of Cutthroat Island! With the Morning Star anchored offshore, you’ll make your way to the beach and a trackless jungle that’s filled with ferocious beasts and treacherous quicksand. Fortunately, a series of caves honeycombing the island allows a quick trip through this perilous stage.

SHOCK THE MONKEY

Fingers left the three pieces of the map to his heirs but neglected to warn them of the island’s dangers. This menacing monkey doesn’t like buccaneers homing in on his turf. Fast on his feet, he easily eludes most sword thrusts. It’s better to slide-kick the simian back into the woods.

TROPICAL TROUBLE

There’s plenty of jungle for your exploring. Luckily, you can dash through fairly quickly if you enter Caves B and C coming ashore. When you exit, head left and descend Caves C, where you’ll find more jungle. If you try to return, you’ll find yourself in a cavern concealing one of the treasure chests for the Cutthroat Island contest! Now you have the treasure and have proven you’re the ablest.
THAT SINKING FEELING
 Morgan's ancestor, Fingers Adams, was the only person ever to escape Cutthroat Island alive. Legend has it that some of Fingers' pirate pals sank into this quicksand pit, never to return. Avoid that sinking feeling by climbing a nearby vine and leaping from branch to branch until you've reached solid ground.

DIG UP BURIED TREASURE

If you would pass up a chance to find questions will appear. Send in the correct answers and you'll have a chance to win valuable prizes, including a real-life treasure hunt in the Florida Keys! Other prizes include gold bars, movie passes and the video of Cutthroat Island.
Get ready for 10 stages of rollicking action on the Spanish Main as you search for buried treasure on...

A LASS WITH A CUTLASS

Acclaim has made sure that hand-held aficionados don't miss out on the swashbuckling fun by rolling out a Game Boy version of Cutthroat Island. Join Morgan Adams as she thrusts and parries her way from His Majesty's Colony of Jamaica to a legendary lost treasure buried on uncharted Cutthroat Island!

Working a bit of programming magic, Acclaim kept 10 of the 12 stages from the Super NES version of Cutthroat Island, jettisoning only the Quarry and Carriage Chase. Play starts out with Morgan Adams and her trusty rapier, but you can add to your arsenal by picking up knives, bombs, pistols and bottles. Like the 16-bit version, players can restore energy by grabbing food or medicine, unlock doors with keys and grab 1-ups. The lack of Super Game Boy enhancements may bother some, but players with a hangernik for relentless action and a strong story should check out this non-stop swordfest!

Morgan's father, Harry, taught her everything he knew about the sweet science of sword fighting. As she thrusts and parries her way to the treasure, Morgan will learn new attacks. These are only available after she's landed a string of successful hits, causing her Aggression Indicator to light up.

Many a scalawag in Spittalfield and Spittalfield Tavern is determined to relieve Morgan of her map pieces. The Charging Lunge is particularly potent against buccaneers brandishing big broadswords. Matters go badly awry when Morgan breaks into prison in hopes of finding someone who can read the Latin inscription on her map piece. Unleash the Thunder Roll when your nasty enemies least expect it.
BEYOND THE JUNGLE

Dawg Brown, a pirate of unspeakable cruelty, dogs Morgan every step of the way through Jamaica and over the bounding main to Cutthroat Island. Even then he won't let up, pursuing Morgan as she slashes her way through a trackless jungle and descends a sheer cliff to reach the treasure cavern.

CLIFFS

The jungle ends abruptly at a sea-soaked cliff. Holly pursued by a company of British Redcoats, you'll have to scamper down fragile vines and across slippery rocks to reach the entrance to the treasure cavern. It seems that Dawg will win a full pardon if he can deliver half the treasure to Governor Ainslee of His Majesty's Island Colony of Jamaica. The corrupt governor has dispatched the Redcoats to bring home his share.

TREASURE CAVERN

The glistening treasure lies buried in a cavern measureless to man! Tread carefully by the bones of the doomed pirates from the Sea Devil and stab at the bloodthirsty bats swirling in the gloomy air. Fortunately, your human pursuers got a big case of the willies when faced with the prospect of entering this dank den.

IT TAKES CUNNING AND GUILE TO MAKE IT TO THE TREASURE CAVERN

It's not easy being an honest citizen in Spittalfield, but a few plucky souls are up to the task. These forthright folk take the law into their own hands, tossing bottles and bombs at the swordfighters clogging the streets. You can get hurt by these flying objects, but so can your opponents.

COVE

You have the treasure, but your troubles have just begun! Governor Ainslee is waiting for you on the beach outside. True to his greedy nature, Ainslee wants all the booty for himself! Your most cunning opponent yet. Ainslee deviously dodges many of your moves, then thrusts with lethal accuracy. Make sure you've mastered your blocking maneuver and your bonus attacks, or you'll never see Kingston again!
The Killer Instinct challenge continues! This month we want your coolest Glacius scores. Select Glacius and give your opponent some serious frost bite in two-player mode. The top scores that break the ice will dominate the icy realms of the Battle Zone and the ten best players will receive four Super Power Stamps.

CHALLENGE #1

MADDEN '96
Super Bowl hysteria and hype is gone until next year, but the MVPs for Madden '96 have yet to be named. Send in your top world records to the Arena. We'll post the names of the best players in every category, from yards passing to the most points scored in a single game. In the event of a twenty-way tie for longest field goal or longest run made, the winner's names will be printed on a first come, first served basis. Take a shot of your Madden '96 World Record Screen and mail it in to the Arena today!

CHALLENGE #2

SUPER MARIO KART
Due to popular demand, the Mario Kart Challenge is back! Rev up your engines and grab a red shell—the new challenge series includes a whole new selection of tough tracks. This month we're looking for the fastest times for Koopa Beach on the Star Cup Circuit. How fast can you drive and keep the sand out of your ears? Pick your favorite racer (Donkey Kong is our personal favorite, but watch the turns) and glue your thumb to the accelerator. The top ten times scoot away with four Super Power Club Stamps!

CHRONO QUIZ

1. Name the Dome where you find the hungry people in A.D. 2300.
2. What does the Wallet item do?
3. Where do you find the Zodiac Cape?
4. Name Ayla's village.
5. Which Rock allows you to execute the Poyozo Dance?
6. What do you pour on the grave in A.D. 1000?
7. Name the town where you find the Black Rock.

CHRONO TRIGGER

If you've ever hung out in Nintendo Source's Power Circuit chat room on AOL, you already know that Chrono Trigger trivia is a hot conversation topic. Take the following quiz for fun and see how you measure up. Remember, people in the chat room don't have time to look up an answer in the Player's Guide. The answers will be in the next issue of Nintendo Power.

1. Name the Dome where you find the hungry people in A.D. 2300.
2. What does the Wallet item do?
3. Where do you find the Zodiac Cape?
4. Name Ayla's village.
5. Which Rock allows you to execute the Poyozo Dance?
6. What do you pour on the grave in A.D. 1000?
7. Name the town where you find the Black Rock.

Super Mario Kart

Life in the Fast Lane

Mario and company are back on track with the Mario Kart for the Super NES. This first rate Pac-Mac will return in May with the same crisp control, inventive game play and varied levels of challenge that have made it a best-seller since it was originally released. (If you doubt us, check out this month's Super NES Top 20 List!) On top of that, all Super Mario Kart game packs (original and new editions) are now compatible with the XBand network! You can challenge not only the best drivers in your neighborhood, but around the country as well!
Behind the Wheel

In case you haven't been in the driver's seat recently, here's a refresher course on the basics of SMK. GP (Grand Prix) mode pits one or two players against a field of computer-controlled karts in 50cc, 100cc and 150cc classes. Two-player Match mode uses the same karts and tracks as GP mode, but there are no other opponents. In Battle mode, two drivers go head-to-head on maze-like tracks, using weapons and power-ups in a game of motorized tag. Each driver has specific strengths and weaknesses, and you shouldn't have a problem finding someone that fits your driving style.

Need For Speed

Acceleration vs. top speed. Speed vs. maneuverability. Any of the drivers can take the checkered flag, but since each GP and battle track is different, no one can dominate an entire series. Take time to explore your driver's limits and the layout of the tracks.

MARIO

Mario and Luigi have almost identical abilities. They're good overall, and they'd be fine picks for novice drivers.

PRINCESS

She may be royalty, but she gets down and dirty on the track! Acceleration and cornering are her strong points.

BOWSER

Bowser's top speed is pretty high, but he may not be able to take advantage of it on some of the twisty tracks.

KOOPA

This little Troopa is a killer in the corners, and no one can match his stability at the limit. Punch him!

LUIGI

Luigi and Mario also share a weakness: their cornering abilities are not up to their acceleration and top speeds.

YOSHI

Yoshi can also accelerate at a hard, but he doesn't have quite the Princess's cornering ability. Watch the right turns!

DONKEY KONG JR.

Before Diddy, there was DK Jr! This hefty monkey has bulk in his favor, and he can bump anyone out of his way.

TOAD

Toad has nearly Koopa's cornering ability, and he's got better acceleration and top speed. He's the top pick for GP vets!

Super Mario Kart joins a growing roster of terrific games for use with the XBAND Network service from Catapult. Using the game, a Super NES and an XBAND modem, you can challenge other racing enthusiasts on the XBAND network to two duels on any of the Battle or Match mode tracks. If a tiebreaker is needed, you'll run one Match race or fight one Battle to determine the winner. It costs just $19.99 to sign up for the service, and this fee covers the modem and one month of unlimited connects Monthly payment plans vary, and you're charged by your phone company for long-distance connects, just like long-distance calls. You can restrict your connects to local numbers or sign up for the XBAND Nationwide plan, which features discounted long-distance rates from MCI. Check it out!
The fun of two-player games comes from the challenge and unpredictability of going up against a live opponent, and the SMK Battle mode is an especially raucous good time! Here are a few tips that will help you in the heat of a battle.

**Feathers**
Your main defensive power-up is the Feather, which carries you higher and farther than a normal hop. Though it’s not foolproof, it’s the best way to avoid all those pesky Homing Shells your opponent keeps firing at you!

**Homing Shells**
The red Homing Shell is the weapon of choice of battle-hardened veterans, but it takes a steady eye and trigger finger to use effectively. Never use it on a straightaway unless there’s nowhere for your target to turn, and if your opponent has a Feather, try to psyche him into using it before you shoot.

---

**Best Drivers**

**KOOPA TROOPA**
Koopa can turn on a dime and reverse direction in the blink of an eye. This is crucial on tracks with a lot of obstacles to weave around, like tracks two and three. If you start to turn before you get up to speed, you can track an opponent who's circling you and not spin out or lose much momentum.

**TOAD**
Toad is a notch below Koopa in maneuverability but a tad faster. You'll have the edge on tracks one and four, where you can outrun an attacker and duck around a turn before he can draw a bead on you. Spinning out is a worry, but you can power slide very effectively if you're good with the throttle.

---

Watch your opponent's screen and wait for him to fire a shell. You can leap just before the shell hits or hop behind a wall.

You can also use the Feather to switch lanes and get the drop on your foe or collect a power-up before he does.

A Homing Shell can turn only so fast, so don't expect it to track around corners well. If you're on the receiving end of one, a quick hop and a course change may throw it off just enough to miss you.
Take a Dive
Another sneaky way to avoid an attack is to jump off the track completely. The Feather can carry you over the wall that borders the track. You'll sit in no man's land until Lakitu comes along to haul you back. If your opponent has a Homing Shell, just hug the outside lane until he makes his move, then take a dive over the wall.

Power-Ups
What should you do when the supply of power-ups runs low? If you like quantity over quality, then clear the track as quickly as you can. Once the power-ups are all gone, they'll reset. If you like a game of cat-and-mouse, try to get a Homing Shell then guard the remaining power-ups.

Invincibility
The Star gives you a speed boost and grants you invincibility for a short period. Not only that, if you touch your opponent when you're invincible, you'll score a hit! Try to catch your opponent and back him into a corner. By the time he's able to turn around, all of his shields will be gone, and you'll be victorious!
The key to victory in GP and Match play is to get to know your driver and the individual tracks. With the wide variety of tracks in each GP series, no one driver can dominate an entire circuit, so you'll have to use your skills and power-ups wisely. In Match mode, you'll choose the tracks you race on, so to keep things fair, both players should pick drivers with similar abilities.

**Banana Peel Strategy**

Banana Peels are great for taking care of tailgaters or just thinning out the pack. If you don't have an immediate target, drop it off in a sharp corner. Peels can also be fired ahead of you by pressing Up and A, but they fly very far and often fall beyond the track.

**Best Drivers**

The other drivers have useful skills, too, and here are a couple that you might want to experiment with:

- **Bowser**
  Both Bowser and Donkey Kong Jr. are experts at ramming, but Bowser has a higher top speed. Take advantage of straightaways, but cut corners whenever possible. You can turn pretty well, but because of your weight, power sliding will send you spinning or bleed off too much speed if you hold the turn too long.

- **Koopatroopa**
  His maneuverability made him the top pick for the Battle mode, but with the varying track conditions in GP mode, there are times you'll wish for a bit more get-up-and-go. You can make up for this by cutting corners whenever you can and saving good power-ups, like Homing Shells and Banana Peels, for crucial moments.

**Princess**

The Princess and Yoshi have very similar abilities, but Her Royal Highness gets the nod for her better cornering ability. Her only weakness is her light weight, making her susceptible to bumps from the other karts. Keep an eye on the track map or your opponent's screen and steer clear of any clusters of karts.

**Toad**

Now it's the little mushroom dude's turn to shine! If you like power sliding, Toad is the guy for you. Ease up on the throttle just a bit and do a little hop as you enter a turn, then as soon as your kart's nose is pointing in the right direction, let go of the Control Pad and hit the gas!

**Ramming**

Ramming is an often overlooked tactic, but a couple of bumps from someone like Bowser will send most karts spinning out of control and out of action for a good three seconds, at least. If you've got a tight cluster of karts around or behind you, you can create quite a pileup!
**Cut and Jump**

Watch for places where you can jump or cut across gaps. For example, look at the bottom curve of Mario Circuit 3. There's a hole in the wall big enough to drive through! In Bowser Castle 2, there's a side track that juts out into the center of the lava pool. You can jump over the lava using a Feather or a Mushroom and shave seconds off your lap time. Even if you fall in the lava, if you just touch the opposite side, Lakitu will drop you off there!

**GP Vs. Match**

In GP mode, you can turn the crowded field to your advantage by causing pile-ups or otherwise turning the rest of the drivers against each other. In Match mode, you don't have that luxury, and you'll have to rely on your driving skills and knowledge of the tracks to grab the checkered flag. Use the Time Trial option to explore each track and experiment with different drivers. Keep an eye on your opponent's screen to see where they are in relation to you. One last secret tip: if you rev your engine at the right moment before the green light comes on, you'll get a speed boost at the start of a race!
Making the Grade

As you might imagine, a lot of people want to make video games. It's not easy to get in to DigiPen, but the students who are accepted are glad to be there.

According to Claud Comair, president of DigiPen, the basic requirements for admittance include being proficient in the English language, maintaining a B average in high school mathematics, and having ideas for game storyboards.

DigiPen is a two-year, six-semester program. Students learn about the basics of game creation in their first year, along with high-level programming. They also study computer math, computer environments, computer operating systems, and the principles of computer graphics.

If you think that sounds like a lot of work, you're right! DigiPen students generally attend classes and workshops 13 hours a day, six days a week. There's no sloughing in this school. You either love video games and attend everything, or you find another field of study.

In their second year, DigiPen students learn about storyboards and game concepts, and create sophisticated games—like Red Shift.

The payoff is almost immediate. Companies like Iguana and Electronic Arts often visit the school to recruit the students. Best of all, Nintendo of America is a major sponsor of DigiPen. Students graduating at the top of their class may get to work on the Metroid, Zelda, and Mario games of the future.

The Fearless Team

We took you behind the scenes at DigiPen, the video game college, for the first time last August. Now we want to introduce some of the lucky dogs who are studying there, learning to make games, and we'll show you one of the projects in the works. The students at DigiPen work in teams. This month, meet Fearless, a special team including Ryan Higa, Josh Brown and Mark Vaughan, who have created a strategy game they call Red Shift.

Ryan Higa

Twenty-one-year-old Ryan Higa, from Montebello, California, says he was raised on video games. "I always wanted to know how to make them but it seemed like there weren't any classes you could take. I've been playing them as far back as I can remember, beginning with Pong on the Odyssey 2000. My interest was re-sparked in 1986 when the Nintendo Entertainment System (NES) came out. Being able to play Super Mario Bros at home was a dream come true."

After graduating from high school, Ryan enrolled in the school of engineering at the University of California at Los Angeles (UCLA). It was while Ryan was at UCLA that he learned about DigiPen. "I read an article in a video game magazine that changed my life. It was about a school in Vancouver, British Columbia that taught video game programming. The school is incredible. I came here with basically no experience and after almost two years of intense dedication, I'm developing the skills and work ethic which I hope will be rewarding in a demanding industry."
Mark Vaughan

Mark Vaughan, who at 27 is the "old man" of the team, grew up on Pong and the Atari 2600. The Vancouver, British Columbia, native learned programming on the Apple II, but his chief love was video games.

After high school, Mark attended the University of Victoria, where he took courses from almost every department as he attempted to find his "true calling in life." In the end, he earned a bachelor of arts degree from Simon Fraser University (in Vancouver, B.C.)

It was Mark's father who opened the way to DigiPen. His father showed him an article in the Vancouver Sun that was titled "Nintendo Opens Video Game School For Nerds." As soon as Mark read the article, he knew his future was sealed.

Josh Brown

When Josh Brown was growing up in Lacombe, Alberta, he enjoyed watching his older brother beat people at video games more than playing them. His family owned an Intellivision, an old 4-bit system. It wasn't until Josh got an Apple computer that he began playing games himself.

Josh, now age 20, says his life changed in 1986 when he first saw the NES. "I was awakened to cool new graphics, rich colors and exciting gameplay. And game after game, Nintendo continued to amaze me. Just when you thought it couldn't get any better than Super Mario or Zelda, Nintendo would release a sequel and it would blow you away."

Because of his love of games, Josh began his college career studying computer science at the University of Alberta but found that he was not really doing what he wanted to do. "All that changed one day when my brother picked one of my old magazines out of my garbage for something to read and saw a little article about a video game programming school in Vancouver."
The Fearless Prototype

Josh, Ryan and Mark definitely aren’t the types who claim that the dog ate their homework. After six months on the project, Team Fearless has ended up with a playable prototype that pits clan against clan in a real-time strategy game set in the not-so-distant future. Take a look. If you were handing out the grades, how would you rate Red Shift?

The Red Shift Realm

In the second half of the 21st century, a giant meteor strikes the earth and destroys civilization as we know it. The earth is now ruled by four clans, each competing for total domination:

Cult of Science: Worshippers of the long-lost computer, these post-apocalyptic scientists have devoted themselves to war through science, rather than the science of war. Using their technology to build massive fortresses and enormous weapons, they choose brute force over strategy.

The Corporation: The remnants of a cruel international police squad, the Corporation has mastered stealth technology. Their highly trained espionage squads capture and reprogram enemy units, making the Corporation a formidable foe against even the strongest enemies.

The Seed: Having shunned technology to develop magic, the members of the Seed do not rely on tanks and missiles. Instead, they command demons and imps to do their bidding. If they are lucky, soldiers captured by the Seed are offered as human sacrifices. Unlucky prisoners suffer a much worse fate.

The Gaia Revolutionary Army: Dedicated to rebuilding the earth, the members of the Gaia Revolutionary Army have mastered genetic engineering. Though they eventually want to use their science to bring back nature, they must first use it on themselves, creating an army of super soldiers to fight the evil cults that inhabit the Earth.

A World of Algae Eaters

In order to win your battles and save the world, you must build armies, develop new technologies, fortify bases, and feed your hungry men. After the great meteor strikes, the only food left on the Earth is algae. To keep your armies going, you will have to set up algae tanks to feed your men and post guards to protect your food supplies.
Construction

In Red Shift, the most important unit is the Construction Yard. This is the team that builds the Barracks, Power Stations, and Factories that keep your armies going. Protect your Construction Yard and keep it busy. If you don't, your enemies may eat you along with your algae.

Once the Construction Yard is up and running, you can use it to build other structures, such as a Vehicle Factory.

Reconnaissance

There's no telling what may be hiding nearby in unexplored territory. You may be near an enemy army or an entire enemy base. You may also be near a rich supply of food and materials. The only way to find out is to send reconnaissance squads to map the area.

The battlefield remains blacked out in Red Shift until your men explore it. Once they do, the landscape appears on your screen and you can look for supplies and enemy forces.

A lone soldier can map an entire sector, but if he runs into the enemy, he's unlikely to survive. A large squad can survive a skirmish until you send help, but don't send away too many men and tanks or you'll leave your headquarters defenseless.

Resources

The key to winning every campaign is using your resources wisely. Don't waste materials building unnecessary Factories—you may need those supplies for repairs. Prepare before attacking the enemy, and make sure that your buildings are well defended.

The best defense may be a good offense, but you won't have much of either if you run out of building materials or food.

If you fail to manage your resources wisely, your civilization will fail. The enemy can easily wipe out a poorly managed compound.

Once players have established a Power Supply, they'll obtain a map that will display the areas they've explored. It's a useful item.

Obtaining the Construction Yard is a primary goal. Players can't build any of the other structures they'll need until they have the yard.

Players can use the Vehicle Factory to create vehicles for various purposes, but they can't use them until they're manned with soldiers.

Players can't have soldiers if there's no place for them to stay, so they must construct Barracks first. Each Barrack will hold a certain number of soldiers.

Soldiers can't live on sand alone. Players must construct enough Algae tanks to feed all of their troops, keeping them fit for active duty.

MANAGE YOUR RESOURCES
Since its Moscow release in 1985, Tetris has swept across boundaries and created unsurpassed international puzzle hysteria. But the original game of falling blocks and all its sequels were just training exercises for T & E Soft's...

T & E Soft's new title isn't Tetris as you know it. It isn't a puzzle game for button-munching sissies. This is a REAL puzzle game that requires the REAL brain cells of REAL, down-to-earth people. Still reading? Good. Then you have found your game. Virtual Boy 3-D Tetris contains three different puzzle games using block shapes that are twisted or rotated into a stack within a wire-frame structure called the "well." The game is so versatile that it uses every button on the Virtual Boy controller. A battery-backed save option not only saves both high scores and names, but also saves your progress in Puzzle mode, so if you're really stumped on a level, you can take a break and think about your next move.
In all three games, the 3-D action revolves around dropping block shapes, known as tetrads, in an orderly fashion onto the floor of a well. An empty well has five layers, or floors. A handy radar display on the right side of the screen shows players the contents of every floor from the bottom up. Stacking blocks sounds easy in theory, but things quickly become complicated.

Get a new perspective!
As the games progress in levels, the tetrads begin to fall faster and faster, which means players have to keep a close eye on the action. One of the best ways to do this is with the rotating perspective. As the gamers place blocks, the well rotates on its base, letting players see all the action from every angle. If you decide that you don't like the rotating perspective (or you want to make things tough on yourself), you can switch it off with a tap of a button.

Five floors might seem like a lot of room to maneuver in, but if you mess up and fill the well incorrectly, you'll lose room to play one layer at a time.

If you've played any previous Tetris game, you remember that all you had to worry about was which way to spin and drop your block. These tetrads rotate, and you have to think about your game strategy in a whole new way. Depending on the shape of the tetrad, a single block might have six different positions, and one of them might be a perfect fit.

Find a perfect fit

Tumbling Tetrads
The original Tetris game had seven tetrad shapes, but all three modes of Tetris 3-D contain new shapes never before encountered in tight situations. Capitalize on the game's third dimension by rotating and flipping each piece as it tumbles down the well. Remember to think in three dimensions. The easy levels of every game start with basic tetrads, blocks with no corners, zigs or zags. The pieces become more complex as you progress through the levels and plunge down the well faster than a truckload of cinder blocks.
The object of the Center Fill game is to drop tetrads symmetrically around the center square of each well layer, and after the floor is nearly complete, to drop a block into the center square. When the tetrad hits the center hole of a complete layer, the floor is cleared and points are scored. Blocks dropped in the center of an incomplete layer are vaporized.

Middle Square Mania

Center Fill mode has three styles of play. Type A allows players to complete as many levels as possible for a high score. Type B is similar, but the lowest well floor contains random obstacle blocks. Clear It, the third Center Fill game, has individual stages made up of ten floors per stage. In all three games, players can pick and choose their blocks, vaporizing unwanted tetrads on the center square.

The More Points the Better

As the Center Fill game progresses, complex tetrads begin to fall faster than raindrops in a thunder storm. The trick to nailing a high score is to clear your blocks perfectly at the beginning of the game and then to try to hang on as the levels progress. Thankfully, 3-D Tetris has a user-friendly button configuration that is easy to master. Spinning and rotating tetrads become second nature, letting you immerse yourself in a virtual world of tumbling blocks.
Outside in

If you're looking for a new high score, try layering blocks along the perimeter of the well, keeping a space open at the center. When the layers are four deep, place a long tetrad (the same shape you used to score a tetris in the two-dimensional game) in the hole you left in the center and clear all the floors at once. This strategy is easier to explain than it is to master, but if you keep your floors flat and the outer perimeters full, you'll see higher scores every time.

Mere Child's Play?

Stacking blocks might seem like a basic skill, but if you've ever played a Tetris game, you already know that the action gets fast, furious and highly addictive as the levels progress. In past Tetris games, you raced to build a seamless wall with an assortment of blocks. Now you're building perfect cubes in a tight well, which requires a new dimension of thinking. You need to consider height, width, and depth. Of course, if you were one of those unfortunate kids who had their Game Boys stolen by their Tetris-mad parents, you might want to hide your Virtual Boy system under your bed and remind them who they bought it for.

Virtual Boy 3-D Tetris is just like the original Tetris game, but you must place the pieces in a three-dimensional environment. Each time you fill a floor of the well, the blocks are cleared and you score a brick load of points. Clear all five floors at once to add 10,000 points to your score. If you fill the well, the floor will begin to collapse layer by layer.
Puzzle mode is undoubtedly the toughest and most innovative game in 3-D Tetris, and once you figure it out, you'll be back for more. The object of the game is to reproduce a shape with a limited inventory of tetrads. Like the first Tetris game, the premise is easy to learn but tough to master, and you'll find this game only in a 3-D environment.

If You Build It, It Will Run

At the beginning of each Puzzle mode stage, a polygon shape appears and you must reproduce it from the tetrads at the top of the screen. Examine your tetrad inventory and devise a basic strategy before you start the level. If you build the puzzle correctly, you'll be able to identify the shape as it morphs to life in an animated sequence.

What is it? Complete the puzzle layer by layer. Part of the fun of Puzzle Mode is discovering what you made. You'll get the answer when you successfully complete the puzzle.

There are a few blocks remaining in your inventory. Rotate them into position and complete your puzzle. If the blocks don't fit, try to figure out where you messed up.

With few exceptions, all the block puzzles through Stage 14 can be successfully completed by building a layer at a time. Building layer by layer makes the game easier.

Line up your foundation blocks on the highlighted squares on the wall/floor. Keep in mind that if a block lands out of place, you will have to start the stage over.
Improvise!

Sometimes you will need a certain tetrad to complete your puzzle, but your inventory won't have the piece you need. One trick is to improvise. You can build the shape you need by combining two or more tetras. If you still can't find a solution, try flipping and spinning the pieces a new perspective may solve your dilemma.

Flip It As It Falls!

Even if a tetrad looks impossibly out of place, try rotating the piece several times and looking at it from every perspective. You might find a solution to your problem from a different angle. Remember that some blocks break apart as they make contact with the stack, allowing you to move the tetrad fragments to new locations.
Griffey chats! Fans from Boston to San Bernardino logged on to America Online’s Center Stage one night in late January to pitch questions at Ken Griffey Jr. It was the biggest turnout for a sports celebrity on AOL—ever! Griffey gave his opinion on everything from growing up as the son of a big-league star to his upcoming Super NES game, Ken Griffey Jr.’s Winning Run. The event capped two busy days in San Diego, where the technical whizzes at Angel Studios were capturing the centerfielder’s patented swing for a forthcoming Nintendo 64 title.

One of the coolest things about going on-line is the ability to question favorite stars and celebrities directly. America Online has dozens of special chat events every week. Here’s a short guide to making your voice heard.
Eager to query their hero directly, fans hurled thousands of questions at Griffey during the hour long event. Since not even a Golden Glove winner like Griffey could field that many questions, Geoff Rainville (GRainville), who runs Nintendo Power Source on America Online, helped out by moderating the event. The two huddled around a laptop at Angel Studios right next to the MOCA (motion capture) stage where Griffey was swinging for the computers. Right afterward, Griffey went back to the business of making a top-flight Nintendo 64 game. Curious about Griffey’s favorite Killer Instinct fighter? Then read on. For the benefit of Nintendo Power readers who couldn’t make it to the event, here are the highlights! If you want the complete transcript, log on to Nintendo Power Source on America Online, then click on What’s New.

GRainville: Ladies and gentlemen— we’re thrilled today to have Ken Griffey Jr. with us for this on-line event. Ken is right now crashed on a couch reading over my shoulder. We have Jennifer typing for him. But he is with us trying to get comfortable. Send your questions to the Interact area, and we’ll answer as many as we can.

Question: Is Ken Griffey Jr. HERE????

Griffey: Where else would I be?

Question: Why don’t you wave or smile at the fans when you walk to your car after a game?

Griffey: After being at the ballpark from 2 p.m. to 11 p.m. and considering the numerous threats I have received over the last few years, it is kind of hard to come out in a very cheerful mood, no matter if we win or lose. The safety of my family is very important to me.

Question: Which stadium do you like to play in the most? And why?

Griffey: I like any stadium that I hit a home run in.

Question: How do you like playing pro baseball?

Griffey: It can be tough sometimes, but I grew up with the game and I really enjoy it. I can’t think of doing anything else.

Question: Ken, who or what are you most grateful for?

Griffey: My mother and father, who took the time to raise me.

Question: Mr. Griffey, I am 10 years old and in fifth grade. You are the subject of my biography report. I was wondering about your plans after baseball?

Griffey: Hopefully I can get my handicap in golf to scratch or better so when I retire I can play some golf and fish.

Question: Ken. Do you have any advice for a young person on how to hit
Angel Studios has wowed audiences worldwide with dazzling 3-D effects in flicks like Lawnmower Man. At last fall’s Shoshinkai show in Japan, game players oohed and aahed at the eye-popping graphics for Buggie-Boogie, Angel’s upcoming off-road fest for the Nintendo 64. With such expertise, Angel was a natural to do the motion-capture for Ken Griffey Jr.’s Nintendo 64 game.

Griffey gets wired

An engineer must recalibrate Griffey’s high-tech suit each time he puts it on.

Griffey: Swing hard in case you hit it (laughs). Just keep your eye on the ball and have fun. It’s just a game.

Griffey: It gives me the chance to play in ballparks that I have never played in.

Griffey: [The] hand is fine. I haven’t started hitting yet, but I will be doing that sometime next month.

Griffey: Playing with my dad. Because no matter what I have done or will do (they can’t take away the fact that we were the first father and son to play together in the big leagues).

Griffey: She’s my favorite fan. If I give you my address, will you send me an autograph?

Griffey: I’d like to play until they tear the uniform off me.
Griffey: Video games.

Question: Greetings! Is the new [Super NES] game better than the old one?

Griffey: Yes, the new game is better than the old one. We have new technology, better graphics!

Griffey: What is your favorite Nintendo Game?

Griffey: Killer Instinct. My favorite character is Glacist.

Rainville: He's trying to talk us out of a K.I. 2 arcade game right now.

Griffey: I have never been afraid of being overshadowed. When I was a rookie, I was overshadowed by Dave Valle, Harold Reynolds and Alvin Davis.

Griffey: Will you be coming out with a [new] KGI Jr. Presents Major League Baseball (for the Super NES)?

Griffey: Yes. It's called Ken Griffey Jr.'s Winning Run.

Question: Ken, what is it like doing motion capture instead of baseball?

Griffey: It's almost like playing baseball. A lot of hurry up, then wait.

Question: What was it like to score the winning run against New York in game 15 of the AL playoff series?

Griffey: It was a lot of fun. You dream of scoring the winning run in any league, any level and I got a chance to do it when the whole world was watching.

Question: I'm from West Chester, Ohio. We were going to CCDH High School. What are your thoughts about the school?

Griffey: Well, I went there 9 years ago, and I don't know what it's like now. But it was a good school then and I can get a good education there.

Question: Are you nervous Ken?

Griffey: No, I am not nervous about being on-line.
Welcome to this edition of Yoshi's Island's Most Wanted. I'm Yoshi, filling in for the vacationing Yoshi. Tonight, we look at a veritable rogues gallery that has been plaguing our once-peaceful island paradise.

The menacing Magikoopa, Koomek, has transformed twelve of our island's inhabitants into slimy, squidgy monsters. These twelve villains now pose a threat to Yoshies everywhere. Here with a live report is Yoshi. Yoshi?

THANKS, YOSHI.

We've posted on AYB (All Yoshies Bulletin) for these malefactors. We've provided local authorities with all the information we have on them, and we've included a list of tips and tricks for defeating and apprehending them on the back of this month's poster. Pull out this poster and place it in a prominent place in your home.

These villains are considered sly and dangerous, so use all your Yoshi abilities to protect yourselves and baby Mario.

Reporting live for Yoshi's Island's Most Wanted, this is Yoshi saying so long and good luck!

ZELDA AND SIMCITY RETURN

The classic series of Super NES games from Nintendo will start showing up in stores within the next few months. Epic gamers should rejoice, because this means that two of the best epic games for the Super NES will soon be back in production. Legend of Zelda: A Link to the Past and SimCity both sold out in the United States and have been nearly impossible to find for the last year. A Link to the Past, one of the finest adventure games of all time, was the brain-child of Shigeru Miyamoto and features live action battles and endless action puzzles. SimCity for the Super NES continues to be the ultimate simulation for creative gamers. If you missed either of these classics in the past, don't make the same mistake twice. They are worth every gold piece.

ENIX FANS SPEAK OUT

A few months ago, Epic Center asked RPG fans to write in and express their thoughts about the temporary closing of Enix in America and the consequences that action would have for the RPG community. We are happy to report that, whereas Enix may have doubts about the potential American RPG market, your Epic Center editors have seen an outpouring of support for these games. Hundreds of letters flooded into Nintendo and even more messages were sent to us at WWW.NINTENDO.COM on the Internet. What did they say? Almost everyone was upset that Enix was out of the picture and they wondered about the future of games such as Dragon Quest VI and Tactics Ogre. Several interesting questions were raised in these letters that we would like to answer.

"I have been waiting for Dragon Quest VI for two years! Please find someone to publish it in the US if Enix will not. How much can it cost to simply translate the text messages to English?" — Michael Whinihan, Troy, Michigan

Michael brings up a good point. What is the cost of translating a game from Japanese to English? Consider that you must pay a writer, translators and programmers to make the changes and that the process can take several months. For instance, Nintendo spent about $50,000 just for the game translation of EarthBound. And when you add in the packaging, marketing and production costs of a translation, you end up with a much higher figure.

"It is painfully unfair that all those games that are being released in Japan will never make it to the United States. We have to put up with two years of hype, then two years of excuses and delays..." — Michael Valvano, Davie, Florida

Michael's frustration is felt by all American RPG fans. It does not seem fair. The ridiculously long development time for DQ VI was even noted by Mr. Yamauchi, the president of Nintendo, during his speech at last year's Shoshinkai. As for all the games that are coming out in Japan, one must keep in mind the numbers. Japanese consumers have proven that they will purchase millions of copies of a good RPG. Americans haven't. Clearly, we have to expand our epic gamer base so that it is economically feasible for publishers to release translations in the United States.

"I'm now 75 years old. I may not live long enough to see Dragon Quest VI unless someone takes action soon." — Edith Jeter, Puyallup, WA

If this letter doesn't demonstrate the remarkable nature of RPGs, nothing does. These games are loved by gamers of all ages and walks of life. They involve entire families, like Edith's, and they become a part of our lives. To all of you who wrote to Epic Center, we thank you. Your comments have been noted and all the letters in support of DQ VI have been tallied and that figure has been sent on to the evaluation department at Nintendo of America. But this is just a single, small step. What will really turn things around is for all of us to involve more players with the epic category of games. Word of mouth is still the best way to let people know about great games and to create demand, so don't be shy.
A bit of action, a bit of role playing and a lot of fun wait for those players who plunge into the frantic 3-D world of fun. Legend of the Seven Stars, Mario's greatest adventure, debuts in May, but Super Mario RPG combines many of the best parts of traditional RPGs and platform games. Square's Final Fantasy series was the model for the battle sequences while the tradition of Super Mario Bros. games demanded a lot of action.

Mario runs and jumps in his new, 3-D world, searching for hidden items and some great surprises.
**1. Burt the Bashful**

Burt was just a shy forest dweller until Kamek came along and transformed him into the burly bulk he is today. A change in size didn't mean a change in heart, though, and he'll only make a few feeble attempts to stomp on you. You'll be able to avoid his attacks easily by crouching in the gap in the floor. Feel poor Burt with a half-dozen eggs, and he'll hightail it back to his quiet home in the country.

**2. Salvo the Slime**

The second slime in Kamek's Ick Parade is a not-so-sweet sap named Salvo, and he won't wilt as easily as Burt did. It will take just four hits to make him melt away, and he'll shed a few gallons of goo with every hit. Be careful, though, because the lighter he gets, the faster he'll slurp around the chamber. You can scoop up the Lemon Drops he sheds and turn them into eggs, but if you get slimed by one, the impact will knock baby Mario off your back.

**3. Bigger Boo**

If you face this surly specter head-on, he'll cover his eyes and pretend you're not there. We don't know if it's the power of wishful thinking or what, but your shots won't harm him when he's like this. As soon as you turn your back, though, he'll swoop in for the kill, and this is the only time he's vulnerable. You can tag Bigger Boo's bod by angling your shots off the walls. If you run low on eggs, wait for a bat to fall by. Just a flick of your tongue, and you'll be back in business!

**4. Roger the Potted Ghost**

The ghost of a potted plant? We know that plants and flowers are marked "perishable," but this is too much! Just be careful that you don't perish as you dodge Roger's oh-so sharp teeth and fiery breath. Roger and his Shy Guy pals will literally try to push you over the edge into oblivion, so it's only fair that you return the favor. Roger will take an occasional breather, and that's the time to zip forward and push against the pot with all your Yoshi might.

**5. Prince Froggy**

Kamek's shrinking spell has made you a nutritious part of Prince Froggy's complete breakfast! What are you going to do now? Improvise like heck! Prince Froggy follows his Yoshi appetizer with a main course of Shy Guys. Collect the Shy Guys as they fall and shoot His Highness in the uvula, the red, balloon-like object at the back of his throat. You can avoid the drops of stomach acid that rain down if you stand right below the uvula. This is also the perfect spot for collecting Shy Guys, and you'll have a clear shot at your target as well.
6. **Naval Piranha**

Kamek's sorcery strikes again, this time transforming an ordinary Piranha Plant into the nettlesome Naval Piranha. This voracious vine has an "owie" on him the size of a school bus, and this is the spot you should aim for. You'll have to bounce your eggs off the walls to get the right angle on your shots, and it will be tougher than it looks at first. Jump and hover to avoid Naval's charge attack, and grab the Nipper Plants to make more eggs. One touch from Naval's thorny hide will set baby Mario to crying, and we wouldn't want that, would we?

Marching Milde

Mild she may be, but this happy-go-lucky hussy won't let an errant dino and a fussy baby get the better of her. Eggs bounce harmlessly off her hide, so you'll have to approach this battle from a different angle—from above! Stomp on her head to split her into two Mildes. Keep splitting the resulting pieces until there are no more. Things will get pretty crowded before that happens, so make like a traffic helicopter and stay above the congestion. Though the Mildes can't hurt each other, bumping into one of them will certainly result in an injury collision for you!

8. **Hookbill the Koopa**

This curmudgeonly Koopa had breakfast with Prince Froggy, and he may have eaten a few too many eggs! Wait until Hookbill is standing up, then quickly shoot him four times in the head to knock him over. Your goal is not only to upset him, but his stomach, too! While he's lolling helpless, stomp on his tummy. When he struggles to his feet, jump up on his head as fast as you can and collect the eggs that dribble from his mouth. If you repeat this procedure three times, Hookbill will decide that giving up is better than spitting up!
9. Sluggy the Unshaven

Sluggy is not the best groomed slimeball in the world, but he knows how to make a big impression. You'll have to make an impression on him, or rather, in him, if you want to survive! Take aim at Sluggy's hirsute heart and let fly with an egg barrage. His skin is very pliable, and it will take several shots to break through to his squishy center. If you don't fire fast enough, his skin will repair itself in a matter of seconds. When you run out of ammo, run left to the Egg Plant for a quick reload. Four hits to his heart will send him to the emergency ward!

10. Raphael the Raven

This starlit showdown will have you crying, “Nevermore!” Kamek has transported you and his midnight minion to a satellite high above the Earth’s surface. Raphael will try to turn you into a shooting star with his fireballs, and his claws allow him to grip the globe and run across its surface with dizzying speed. Jump as soon as you see a hint of sparks or a suggestion of movement. The only way to turn the tables on this taloned terror is to stomp on the spikes, punching them out the other side of the globe. If your timing is right, you’ll trip him up.

Make sure that Raphael is standing exactly opposite you when you stomp on a spike, or your attack won’t work.

11. Tap-Tap the Red Nose

You won’t find a “Red Nose” in the pages of any wildlife magazine, but we can tell you everything you need to know about this sinister species. Take the indirect approach to this battle and shoot out the blocks beneath Tap-Tap’s feet to reveal a lava pool. When the hole is large enough, use your eggs to topple him into the fiery cauldron. The usual routine of duck and cover, jump and hover should keep you out of harm’s way, and though your eggs won’t hurt Tap-Tap, they’ll keep him at bay. As the blocks begin to disappear, Tap-Tap’s antics turn frantic, so keep moving.

12. King Bowser

It’s time for Baby Bowser’s nap, but there’s no way he’s going down without a fight! Use your stomp ability to send ripples across the nursery floor. The shockwaves will upset more than the furniture, and three hits will actually make things worse. Once Bowser realizes that he’s not really hurt, he’ll bounce back, whittier than ever. The castle begins to crumble, wait on the far left side of the screen to avoid the two huge boulders. Once they land, jump to the chunk of floor that remains at the center of the room. Dodge Bowser’s fireballs and grab whatever eggs you can. Shoot Bowser’s mouth three times, then leap back to the left to avoid two more boulders. Keep shooting Bowser in the mouth until he’s counting sheep!
THE SKY IS FALLING

The incorrigible Bowser, King of the Koopas, has done it once again. He has snatched Princess Toadstool away from her home and imprisoned her in Koopa Castle.

When will he ever learn? Mario, catching wind of this, rushes to the castle and engages the big brute in battle. But defeat is snatched from the jaws of victory when Smithy, a giant sword, crashes through the Star Road high above the world and plunges straight down into the castle. Mario, the Princess and Bowser are flung far apart by the impact. When they pick themselves up, they find that the world has changed, and not for the better. Mario begins his journey to set things right by going to the Chancellor of the Mushroom Kingdom. There, he meets Mallow, an orphan who wants to find his true family. The two companions head off to find the Princess and they meet Geno, a mysterious entity who must collect the seven star pieces that fell to earth after Smithy plunged through the Star Road. Eventually, the Princess and Bowser join Mario's party, but unless the damage is repaired, no wishes will come true and the Mushroom Kingdom will be doomed.
War of the Gems

Coming soon to your Super NES from CAPCOM
The adventure begins on a high note with Mario and Bowser battling it out on a chandelier in Bowser's Castle.

**MARIO'S WORLD**

The road back to Bowser's Castle (and the ultimate confrontation with Smithy) may be a short one, but the journey takes many twists and turns as players seek out the seven lost Star Pieces. It's not all one-way, either. Players can return to towns to buy items, weapons and armor, or step back to a previous course where coins can be collected easily or Experience Points can be built up quickly. As for variety, Mario must master all sorts of terrain, from the Goomba infested forest of the Mushroom Kingdom to the haunted hold of a sunken ship. Enemies seem to pop up everywhere, but if Mario builds up his Experience Points like a good plumber, he'll be much more than a match for them. Puzzles may be found in many courses and Mario's prowess at jumping often plays a part in their solution.

On this page, we highlight just a few of the sights you'll see in Mario's newly expanded 3-D world.

After Smithy falls, Mario lands in the chimney pipe of his own house.

Goombas and Koopa Paratroopas patrol the route between Mario's House and the Mushroom Kingdom.

Jumping skills perfected in games such as Super Mario World come in handy when crossing the pits of lava.

Choose your path wisely in the forest beyond Rose Town. It's a cunning maze with only one exit.

Beyond the first map area, Mario, Geno and Mallow wander into the rocky region of Moleville.

Rose Town has come under attack from a mysterious archer in the forest. Can Mario save the day?
The Chancellor awaits in the Mushroom Kingdom castle with orders to find the missing Princess.

Precision jumps keep Mario high above the danger of the hungry K-9 watchdogs below the platforms.

Mario may get wet in the pipe world, but he can't be washed up since he can swim like a fish.

Swimming against the current in the waterfall, Mario collects a fistful of coins.

When Frogfucious speaks, Mario and Mallow learn something of their future quest.

Regularly, Mario just punches his foes, but he can be even more effective with weapons he finds or purchases along the way.

Mario must make skillful jumps to cross through this course and avoid the enemies.

Mario's Ultra Flame cooks the competition, but you won't gain use of it for quite awhile.

Mario has never had such a challenge. He's used to fighting Bowser, but now he must save the Mushroom Kingdom from an enemy that comes from beyond the stars. Luckily, our plucky plumber has the suspenders of a true, epic hero. Using an assortment of weapons and Special Attacks, Mario battles through armies and solves puzzles by the score. In addition to his new epic abilities, Mario is still the finest jumper in the land.
TIME TO ATTACK

Prepare yourself for a new type of battle. Mario has put away his stomping boots and strapped on his boxing gloves. Given the chance, he'll use weapons, too, such as the Hammer Bros.' sledge hammer or a Super Fire Ball attack. As in most RPGs, battles in Super Mario RPG are controlled by menus. Once you select the use of an attack or item, you activate the move and the game automatically carries out your command. Unlike most RPGs, however, you have a measure of control over the move after you activate it. In the Timed Attack, you choose your character's Normal Attack by pushing the A button. Push A again to activate the attack, and then push the A button a third time to activate the Timed Attack, which doubles your hits. To make a successful Timed Attack, you must push the A button at just the right moment before the attack begins. Some of the Special Attacks also require extra actions. In Mario's Fire Ball attack, you have to push any button as fast as possible in order to throw the greatest number of fire balls. This is probably the first RPG that can wear out your thumb.

Mallow's HP Rain spell heals one member of Mario's party. A little cloud appears overhead and releases a refreshing shower.

The Thunderbolt Special Attack used by Mallow strikes all of your opponents at once with lightning bolts.

Do you want to know how many Hit Points your enemy has left? Use Mallow's Psychopath to reveal the secret.

The Normal Attack employs a weapon (if it is Equipped) or your character's fists. Some foes are particularly vulnerable to Normal Attacks.

During a battle, Mario and his companion may use items such as Honey Syrup to restore Magic Points or Mushrooms to restore Hit Points.

It may be better to run away and live to fight another day. At other times, you may not be able to run or attack, but you can still defend yourself.
When Geno the doll comes to life and sets off to save Rose Town from the mad archer in the forest, it seems like a fairytale come true. But Mario and Mallow learn that appearances can be deceptive, because Geno is really a guardian of the Star Road who has been sent to earth to recover the seven lost Star Pieces. He uses shooting weapons and a special laser beam. Once Geno joins the party, you will always have three characters.

FREEBIES
Finding unexpected bonuses is one of the biggest thrills in any Mario game. One of the most unexpected (and most welcome) times to get a bonus in Super Mario RPG is during a knock-down, drag-out fight. From time to time, you'll be rewarded with Max HP, which fills up a character's Hit Points. You can also get a free extra attack, which is like taking two turns at once. After using items in battle, you'll often get a freebie to replace the item you just spent. You may also collect items that were held by the enemy. Sometimes, after winning a fight, you are given the chance to play the Yoshi Shell game. If you take the challenge and find Yoshi under one of the three shells, you'll double the Experience Points earned in your last fight.

The Gene Boost spell increases Attack Power for one of your three companions.

The Gene Whirl Special Attack works particularly well against undead enemies.
MARIO'S WILD RIDES

What a ride! Super Mario RPG sends you through so many loops, twists and turns that you'll think you're out of control in a speeding mine trolley. In fact, in the Moleville mines, you will be out of control in a speeding mine trolley, flashing through side-scrolling and Mode 7 areas while attempting to collect coins. But that's just one of the bonus activities you'll find in this quirky world. Expect to be bopped by the gallery of Booster's ancestors, then prepare yourself for the marathon race up the hill to the wedding chapel. Super Mario RPG spills over with puzzles, races, mysteries and mayhem. The events pictured here give just a tantalizing sample of the whole, wild carnival.

YOSHI RACES

What do the dinosaurs of Yo'ster Isle do all day? They run. At the center of the island lies the race track, but lately it seems that one dinosaur has dominated the races and he has become a bully. When you join up with Yoshi to race for the crown, you'll find that you need as much rhythm as stamina. In fact, you have to tap buttons along with the beat of the music in order to move ahead. Simply pushing buttons as fast as possible won't get you anywhere. For an extra burst of speed, feed Yoshi a cookie.

BOSHI

Who is this ultra hip, shaded blue dino with a spiked collar? It's Yoshi's nemesis, Bosh. Who hasn't been beaten at the races in ages. It's up to you to put this blue brute in his place.
**TADPOLE TUNES**

Mozart never used amphibians in his music, but if he had lived in the Mushroom Kingdom, he might have done so. At Tadpole Pond, Mario recreates a melody using musical tadpoles who line up on an aquatic musical scale. He uses a scale of eight notes and clues from a passerby to finish his requiem.

**PIPE VAULT**

On the way to Moleville, Mario and Mallow must navigate the shadowy world of the Kero Sewers, where skill at jumping is a matter of survival. This course almost feels like a regular Mario game as you leap over Piranha plants and hop between blocks floating above a bubbling cauldron of lava. It won't be the only stage in which Mario's jumping talent makes a difference.
Namco's latest RPG is taking the Japanese game world by storm. We don't know if this title will ever grace our shores, but in the meantime, sit back, relax, and listen to the spellbinding Tales of Phantasia!

©1994 NAMCO LTD. ALL RIGHTS RESERVED © KOSUKE FUSISHIMA

In Japan, quality RPGs and simulation games are a yen a dozen, so why has Tales of Phantasia garnered so many rave reviews from critics and fans since its release last December? At a time when RPGs are becoming more cinematic in scope and presentation, Namco decided to play up that concept to the hilt and give TOP the look and feel of an interactive movie. To do this, they turned to a genre of sci-fi and fantasy-related animated films called OAVs ("Original Animation Videos") for inspiration. In Japan, many voice actors enjoy the kind of star status that Americans usually reserve for their on-camera counterparts. A number of famous vocal talents were enlisted to provide the voices for the game's heroes, which are heard throughout the game. Character designs were executed by acclaimed artist Kosuke Fujishima, best known for his hit "You're Under Arrest" and "Oh, My Goddess" OAV series. Even the game's opening resembles nothing so much as a film's title sequence, complete with a digitally recorded theme song and vocals! All of these elements and more combine to bring home the idea that Tales of Phantasia is not just another RPG, but rather an interactive drama.

Designers used a rich palette to color the world of Phantasia and paid special attention to small but significant details like reflections in mirrors and sparkles of light on water.
Adding to TOP's cinematic feel are the "widescreen" battle scenes, with the side-scrolling camera panning back and forth between your party and their adversaries. What has fired fans' imaginations even more, however, is the battle system itself. Rather than using menus, players activate action-style moves by pressing a single button on the control pad. You control only Cless, the main character, during battles. The other characters, including Chester, Cless's childhood friend and an expert archer, Mint, a magic-wielding healer, Arche, a powerful magician, and Klarth, a medium who summons spirits for offense and defense, will automatically attack, defend or disengage from battle according to pre-set orders.

**COMBO ATTACKS**

As our heroes gain experience, they'll learn better spells and attacks. The minor characters will automatically use the moves appropriate to their pre-set commands, but you set the attacks Cless uses in battle. Only one short-range and one long-range attack are available at a time, and you'll gain expertise in an attack until your rating reaches 100%. If two attacks of the same type reach maximum power, you can combine them into a special combo attack, which has greater power and accuracy. Attacks are powered by Technical Points, which are replenished by eating food, using certain items and winning battles.
It has been said that, for war game fans, the beauty of a game is in the details. If this is true, then P.T.O. II is a beautiful piece of work indeed. This month, we look at both overall campaign strategies and individual unit tactics that will help you through the greatest tragedies and triumphs of World War II.

**IT'S IN THE DETAILS**

Few conflicts can compare in sheer scope to the battles in the Pacific Theatre of Operations in World War II. For over three years, thousands of men and machines played a deadly game of cat-and-mouse over millions of square miles of open sea. The armchair admirals at Koei have done an incredible job of recreating the Pacific war with a great degree of realism, but despite the high level of complexity, they have also made this game much more playable than the original. The menu-based command system has been reworked and the turn sequence pared down, making for faster, more manageable and more exciting game play. Other improvements include the ability to supply planes to air craft carriers at any port with an airfield (not just at your home port), and expanded options for organizing, combining and splitting fleets while at sea.

**General Tips**

In P.T.O. II, you can play individual scenarios that cover a month or less of game time, or you can choose campaigns that may take years to complete. We'll first take a look at some overall game tips, then walk through a few sample game turns and discuss specific strategies and individual unit tactics.

**Air Power Is Key**

Aircraft played a major role in the first World War, but World War II marked the beginning of the dominance of air power. Not surprisingly, experienced air crews have better odds in battle, and they can mean the difference between victory and defeat. New pilots start off at experience level 20, and they can get up to level 60 before they engage in a single battle. The best way to deploy your planes (a pilot and his plane are treated as a single unit and can't be separated) is to first supply your base air forces from your national reserves. To raise their experience levels, order the base to engage in battle with a plane rate of fire. When you have enough pilots, engage in battle.

**Use Search Planes**

Assign more experienced pilots to aircraft carrier squadrons.

Air forces to conduct regular patrols. You can then move your experienced pilots from bases to aircraft carriers as necessary.

Even if a search turns up nothing, you can never be sure. You may find a ship or even an enemy tanker or submarine. You can then use the information to plan your next move. You can also use search planes to find ships or other targets, and then use your planes to destroy them. This can be especially useful in naval battles, where you can use search planes to locate enemy ships and then use your planes to attack them.

If you're conducting a lengthy battle or campaign in hostile waters, it's always a good idea to provide air cover, weather and supplies permitting. Any planes chosen for escort duty will remain in the air for the rest of the turn, then return to their carrier. Even if you're surprised by an enemy air force, you'll be able to fight back. You should also avoid docking in hostile waters, even if you're successfully occupied an enemy port. If you need to repair and refuel, take your ships back to a safer port behind the front lines. A docked fleet cannot move or fire its guns, and your ships will be sitting ducks for any attacking forces. For example, let's say your enemy controls Saipan, Guam, Palau and Truk, and you manage to take over Truk. The other islands are less than a day's sail away, so an enemy fleet from any one of those ports could
arrive in your backyard at any moment. Always assume the enemy is near and getting ready to attack!

**Watch the Weather**

The weather can be a thorn in your side, but if you’re flexible enough, you can usually find ways to turn it to your advantage. Cloudy weather reduces your chances of spotting enemy units in a Search, but at least your opponent will face the same problem. Rain, fog or snow will ground all air units, but if you have powerful ships, you can Shell enemy ports or fleets without having to worry about airborne defenses. If luck is with you, hiding behind a rain squall or storm front is the perfect way to approach a base for a sneak attack. Be careful to stay out of a storm, though, since it will totally immobilize your fleet. To find out what the weather is like around you, place the cursor on any part of the Grid Map (not the Main Map) and press the Select Button. You can check the weather at various coordinates before you move or sail.

**Monitor Your Supplies Closely**

All of your forces, including bases, submarines and fleets, depend on supplies to keep going. Choose the Assets menu on the Main Map screen, then choose Net to look at your supply network. Be especially protective of any bases that have only a single supply line running to them. If a base gets cut off (it will flash on the Network display), you won’t be able to replenish its men or aircraft, and it will eventually run out of food, fuel and repair materials. If fleets or submarines run out of supplies while at sea, they’ll be lost permanently. Always include at least four transport ships with a large fleet and protect them in battle. If a fleet is too far from a friendly port, it can rendezvous with another fleet and pick up supplies. Move one fleet close to the other, then go to the Fleet screen and use the Organize command to establish contact. Even if you don’t exchange ships, you’ll be able to redistribute supplies among the fleet transports.

**Submarines**

Don’t underestimate the power and usefulness of your silent fleet. Some players may be tempted to use these very stealthy boats as scouts only, but they make effective offensive forces when used properly. Very few ships are equipped to defend against submarines, and though the early models are not likely to sink many ships, a few well-placed torpedoes can hobble an enemy fleet. A fleet can only go as fast as its slowest ship, and damaging one or two key ships in a fleet can give you a tenacious tactical advantage. You can also use submarines to target a fleet’s transports, robbing it of precious fuel. When using a submarine in battle, be sure not to move or fire torpedoes every single turn, since this will give away your position to enemy ships. On the defensive side, be sure to include destroyers or cruisers armed with depth charges in your key fleets, especially those with aircraft carriers.

**Compromise When You Can**

The policy decisions made at the monthly conference greatly affect how well you’ll be able to wage war, and you should give them at least as much attention as you give to fleet movements. The other military commanders and politicians are more likely to agree with each other than with you, so check over their proposals before you submit one of your own. If you see a proposal you can live with, go ahead and support it. That way, you’ll have at least two votes in your favor from the start of the debate. Save your powerful negotiating cards, like Unity, and Direct, for the middle or end of a discussion. Even if you win one or more people over to your proposal, chances are someone will change his mind after a few minutes. If you want to hide your turn, but you don’t want to use a Hide or Pass card during your turn, then discard a card you don’t need. Be careful not to press B when someone asks you a direct question or you’ll find yourself throwing away your proposal and accepting his. Finally, keep your long-term strategic goals in mind when deciding how to spend the navy’s budget, and build a variety of ships, planes and weapons.

**History**

Don’t worry too much about exact dates and events in history. Though the situations in PTO II are based on fact, the computer does not follow a set script or chain of events. For example, in the "Brink of War" campaign, the Japanese may not attack Pearl Harbor on December 7, if at all. If you’re commanding the Japanese fleet, there’s no guarantee that the U.S. fleets will be at Pearl Harbor on that date. You can take your cues from history, but it

There’s no telling what will happen this time around, would be best to devise your own strategies and plans based on what you observe during the game.

**VOLUME 82**
THE BRINK OF WAR

Using the experiences we've had with PTO II, we've put together a walk-through of the first few turns of "The Brink of War" campaign as a way to illustrate some basic strategies and tactics. All players have their own approaches, but we can at least give you an idea of the types of things you should think about in any scenario or campaign. Let's say you've chosen to lead the U.S. forces. There are reports that the Japanese may attack a U.S. base or fleet within the next few days. The first order of business is to identify potential targets and take stock of your forces.

Potential Targets
You can only guess where the Japanese may attack, but you can try to make educated guesses. Your Philippine bases, Manila and Daiao, have been cut off from the home port is currently full of capital ships, all unfueled and defenseless. Guam and Wake are also potential targets, but the other bases offer more attractive opportunities.

Your Forces
You have three fleets docked at Manila, two fleets just off the Wake Island coast and six fleets at Pearl Harbor. You also have a number of ships stationed at Panama and on both U.S. coasts, but for the purposes of this article, we'll be using the ships at Manila, Wake, Hawaii, and Los Angeles only. Most of your bases have their own ground troops and air forces, and there is a total of 16 submarines stationed at Manila, Wake, and Hawaii.

The Plan
Most of your bases will be able to rely on their own ground units and air forces for protection. Your ships will be used to set up lines of defense around the high-risk targets. Manila in the middle. Hawaii and Wake to patrol the area between Guam and Wake, on the off chance the Japanese decide to strike there. At the same time, they can keep an eye out for ships making a southern approach to Hawaii. Some of you may wonder whether it's worth trying to hold on to the Philippine bases. Though you'd have little chance of holding out against a sustained assault, defenders have the advantage in battle, and you could probably inflict a lot of damage on any attackers. Keep in mind that Japan's production capacity is lower than that of the U.S., so it could be well worth it to damage or sink a few Japanese capital ships right at the start of a war. If an attack does come and the tide of battle turns against you, you can order your ships to head for another waters.

Turn 1
Your ships won't get far without fuel, so all of your fleets should be supplied as soon as possible. Be sure to assign at least four transports to each fleet if they don't have them already. Order the 6th Fleet to supply and the 7th Fleet to patrol nearby. While your fleets aren't shipshape, your ships are already fueled and ready to go. Launch them immediately and deploy them in staggered formations around their respective bases. For now, the ships should hang close to port to keep their search nets tightly woven. Submarines, like ships and planes, can "see" in a given radius around themselves. If these spheres overlap a bit, you'll have a better chance of spotting enemy units. Send four of the Manila-based subs to patrol around Daiao, while the rest patrol the waters between Manila and Hanoi, a major hub for the Japanese navy and the likeliest staging area for an attack. Deploy the

forces in the Pacific and order them to conduct patrols. This will increase patrol experience and your chances of spotting approaching fleets. Keep your air forces balanced between fighters and bombers/attack planes. The air forces at Manila and Daiao are controlled by the army, but they will automatically patrol around and defend their bases. All bases should lay down mines. The mines will hinder any enemy fleets trying to shell the bases or land troops, but your fleets can slip past them. The last task for this turn is to assign commanding officers to all of your fleets. Fleets will perform better, especially in battle, with someone at the helm. Naturally, admirals with high Air ratings should command carrier groups. Even if a commander has no experience, or if you direct a battle yourself, a fleet will perform better with an officer aboard.

Turn 2: Manila
It's time to start deploying your fleets out of Manila. Place two fleets along the defensive line you've already formed at or near coordinates 150-14$ and 50-15$, then send a couple of subs to scout the Japanese base at Hanoi. Just to see if your suspicions about Japanese ship movements are correct. If there are ships there, you can monitor their movements and rob them of the element of surprise. If there are none, at least you'll
have eliminated one possibility and you can start looking somewhere else. The third fleet should be sent south to patrol around Davao. Keep an eye on both the eastern and western approaches. Though the Japanese forces to the east are most likely concentrating on the front lines, there's a chance an attack on Davao may come from Palau or Saipan. Remember to save Movement Points to conduct searches or order attacks during the Plan Phase. If you don't want to micro-manage your fleet, you can also use the Patrol command to make them act independently. A fleet under the Patrol command will always save three Movement Points for the Plan Phase, but it may wander farther than you'd like from its assigned post. If you do use Patrol, cancel the order and take direct control of a fleet as soon as it spots an enemy.

**Turn 2: Hawaii and Elsewhere**

The fleets at Pearl Harbor are refueled but still not ready to set sail. Each type of ship has its own strengths and weaknesses, and most of the Hawaii fleets have only one type, leaving them vulnerable in one way or another. For example, most battleships and cruisers are not equipped with depth charges, leaving them vulnerable to submarine attack, while destroyers can't carry scout planes, making them unable to conduct searches. Use the Assign command on the Main Map screen to pull ships into your reserves, then dole them out again among the various fleets (assigning ships to fleets can only be done at Pearl Harbor). Give each fleet a mix of battleships, cruisers, and destroyers. If you wish, you can use ships from your reserves to bring each fleet to its full complement of eight ships. There's one fleet with a carrier. Los Angeles, and you should have it depart immediately for Pearl Harbor. The plan is to have it rendezvous with a fleet from Pearl Harbor, exchange a few ships, then send the smaller fleet (possibly with one cruiser and a few destroyers) back to the West Coast. Los Angeles will be vulnerable for a short time, but the threat to the West Coast is not great right now, and you need the carrier's strength on the front line. The 6th Fleet should be docking at Wake during this turn, so cancel the base air force's Patrol orders and have them fly Escort over the area. If an attack comes during this turn, the 6th Fleet will be unable to fire back, but the escorting planes will provide some defensive cover. This is always a good thing to do when your ports are close to enemy lines. You may want to Re-arm the Devastator attack planes with torpedoes, in case enemy ships come calling. Always make sure that your planes are outfitted correctly for the mission at hand. If you're expecting an attack primarily from the air, arm your defenders with guns. If you expect to encounter ships, arm your planes with bombs and torpedoes.

**Turn 3**

Your Hawaii fleets are finally ready. Hawaii has a large air force, so send two fleets, including the carrier group, towards Midway. If you really think Hawaii is the target it may not be, remember that, then keep three fleets there. Send your remaining forces toward Wake to support the 6th and 7th Fleets and to see if anyone is approaching Hawaii from Truk, Marshall or Gilbert. The 6th Fleet can leave port and begin patrolling while the 7th Fleet docks and refuels. The Wake air force should remain on Escort duty. All other forces should remain on patrol.

**Concentrate your patrols to the north-northwest.**

During this critical stage, keep direct control of all your forces. A fleet moving automatically may not try to shadow an enemy force. If you spot an enemy fleet, try to follow it and use Search to keep it in sight.

**The Price of Freedom**

From this point, you're on your own. We've discussed some of the likeliest conditions for the start of the campaign, based on our experiences, but your game may unfold in an entirely different way. There's no way of knowing if or when the Japanese will attack, but you don't have to wait for disaster to strike. If a declaration of war doesn't come soon, start sending some of your ships to other places where you think the enemy fleets may be lurking. If you locate them before war breaks out, you may be able to blunt their attacks or make decisive strikes right from the start. You may even have time to send additional help to Manila and Davao. Up until now, we've been thinking mostly in terms of reacting to the enemy, but once war breaks out, you'll have to think about offense as well as defense. All of the questions you've been asking yourself about your defenses should be turned around the other way. Where are the Japanese forces vulnerable? Where can you disrupt their supply lines? Your fleets can't always be around to protect your bases, so unless you have good reason to believe an attack is coming to a specific place at a specific time, your bases will often have to rely on their own troops and air forces. Keep in mind that air power will be a key factor for both sides, so protect your carriers and go after your enemy's. Once the Japanese fleets are weakened, you can begin to attack their bases and land units. The real war in the Pacific took several years, so don't expect to win overnight. If you're patient and cautious, however, you just might be able to go on to victory in the Pacific Theatre of Operations.
Secret Option Menu
If the undersea life is getting you down, use this code to access a secret debug menu that will let you increase your weapons and equipment reserves to a maximum of 99 pieces each and your money to a bank-breaking $600,000! On the main bridge screen, press L, R, B, A, Left, Right, X, Y, Up and Down to make the debug menu appear. Use the control pad to highlight the weapon or item you'd like to increase and press A. You'll have more torpedoes and Stingers than you'll know what to do with!

Press the Select Button to go to the main bridge, then enter the code.
You can access the debug menu anytime during your game by repeating the code.

Start your game as you normally would. This trick works at any difficulty level.
Clear this chamber of enemies, then turn around and go back the way you came.
Shoot the wall to the right of and down from the door.
Voila! A virtual couple will set up housekeeping!

Lemmings Subtitles
This is another trick that's just for fun. On the title screen, place the cursor on the dot just above the “i” in “Lemmings” and press B. A word balloon saying, “Hi!” will appear. Now whenever your Lemmings say something, little word balloons will pop up!

Use the cursor and the B Button to dot the “i.”
Now you'll have subtitles, in case you're hard of hearing!

The Little People
This trick won't help you win the game, but it's fun to do, anyway. Play through the first stage until you come to the room with the small figures running around. Destroy the enemies, then stop and turn back towards the entrance of the room. Fly slowly along the wall to your right and shoot the lower right corner of the wall near the door. A little house will appear, complete with stick people and furniture!
Stage Select and Boss Portraits
The passwords below give you access to a stage select screen and pictures of characters from the game. Enter a password, then start your game as usual. After you pick a character, a stage select screen or an image will appear, depending on the password you used. If you use one of the picture passwords, you can't start a game unless you reset.

Creative Use Of Poultry
We recently discovered three tricks, one that is useful and amusing, and two that are just...well, you'll have to see for yourself! For the first trick, you'll need the Boomerang and the Rooster. Throw the Boomerang as far as you can, then grab the Rooster before the Boomerang returns. As long as you hold the Rooster, you'll be able to fly around the screen with the Boomerang whirling beneath you. The Boomerang will defeat enemies and pick up any items left after a battle. When you drop the Rooster, you'll pick up the Boomerang and all the items collected! As for the other two tricks, sprinkle a little Magic Powder on or fire the Flame Rod at a chicken and see what happens. We wonder what it is about chickens that get the Nintendo programmers so excited!

End Screen and Credits
Are you all guts and no glory, or all glory and no guts? Whether you're jet jockey or desk jockey, you can skip to the end of Jungle Strike if you enter the password 6RCX6K21YOFT. Maybe the parade will be even better if you actually play through the game...then again, maybe not!
Secret Arena

Here's a code that will take you to a secret arena in the Duel Mode. Go to the Options Screen and press Up, Right, B, Down, Left and B. If you enter the code correctly, the screen will flash. Now go to the Duel Mode Player Select screen. Press X and B at the same time on both controllers. If this is done correctly, the picture at the center of the screen will disappear. When you start your duel, you'll appear on a rocky cliff near a mysterious gate.

Stealth Select

To skip ahead to any stage, first enter L, V, D, Y and K as your password, then go back to the Title screen. Making sure the cursor is pointing to the one-player option, press and hold Left, L and R, and then press Start. Use X, A, L and R to choose the stage you want, then press Start to begin your game. It's that simple!

Smoke - Fatality

Want to blow up your opponent—and the entire world? Hold Block and press Up, Up, Forward and Down while standing a screen length away.

Smoke - Fatality

For another explosive finale, stand at close range and hold Run and Block, then press Down, Down, Forward and Up.

Smoke - Pit Fatality

Can you stand one more Fatality from this guy? Stand right next to your opponent and press Forward, Forward, Down and Low Kick.

Hades, Hades and More Hades!

We took a break from Mortal Kombat 3 last month, but we couldn't wait another issue to tell you about some of the awesome codes we've uncovered in the meantime. While it's hard to top the various option menu codes we featured back in Volume 80, we think you'll like what we've got in store this month. We'll start off with a Stealth Player Select code, followed by a few Fatalities and special moves for Smoke, Shang Tsung, Shao Kahn and Motaro. Have fun!
Smoke - Babality
At any range, press Down, Down, Back, Back and High Kick. Come to Uncle Smoke, you little cutie!

Smoke - Animality
Stand far away from your opponent and press Down, Forward, Forward and Block. How would you like to go a few rounds with him now?

Smoke - Friendship
Press Run, Run, Run and High Kick to show your opponent how much you care. This is another long-range move.

Shang Tsung - Kano Morph
To transform Shang Tsung into Kano, press Back, Forward and Block. See, what did we tell you? Bald is beautiful!

Shang Tsung - Saktor Morph
If you like Shang Tsung better as a rampaging cyborg, press Down, Forward, Back and Run.

Shang Tsung - Sheave Morph
To become the proud Shakan warrior, hold Low Kick and press Forward, Down, Forward, and then release Low Kick.

Shao Kahn - Green Fireball
It's green and it's burning. If you want it, press Back, Back, Forward and Low Punch.

Shao Kahn - Sledgehammer
To pull out all the stops, press Back, Forward and High Punch. Where does he keep something that big, anyway?

Shao Kahn - Laugh or Taunt
You can add insult to injury by pressing Down, Down, Down and a High or Low Kick. Just watch what you say!

Motero - Fireball
To let loose a flaming glob of grease, rotate the Control Pad downward from Forward to Back and press High Punch. What a mess!

Experts, shmexperts! If you've got an awesome tip or a killer code, send it in! We'll print your stuff alongside the pros' codes. So what are you waiting for? Warm up your brain pans, crack your knuckles and press those buttons!

Your stick slaps against the ice, transforming the frozen rubber puck on the tip of your stick into a net-seeking missile. You watch transfixed, reminding yourself that it's only a game.

**BETTER GRAPHICS, FASTER ACTION**

It's back! Black Pearl Software aims between the posts with NHL '96, the sequel to NHL '95 for Game Boy. This password-backed Pak features all twenty-six NHL teams plus two all-star teams displayed in bright graphics with smooth motion. You follow the action from the perspective of the puck, watching the screen scroll smoothly up and down the ice. NHL '96 includes a team roster for line changes and even a calendar schedule in season mode. Pick your favorite NHL team and select from five modes of play, including Single Game, Season Play, Playoffs, a Seven-Game Series and Shoot-out. Now you can enjoy hockey on the road, without the fear of getting beaned by a loose puck.

While NHL '96 doesn't include the real hockey stars, fans quickly pick up on the fact that every team reflects the strengths and weaknesses of its real life counterpart.

**ATLANTIC DIVISION**

The Atlantic Division has traditionally dominated in the NHL. With Philadelphia's Legion of Doom and the stunning power of the New Jersey Devils, it's really no big surprise.

POWER PLAYS

Next to great play control, the most important element in any successful sports title is versatility. NHL '96 is packed with options to modify and customize your game. In addition to the five modes of play, you can alter game length or line changes. If you’re tired of being called for off-side, you can silence the referee’s whistle by disabling the penalty option.

LINE CHANGES AND SUBSTITUTIONS

At the beginning of every period, all of your players are rested. As they spend more time on the ice, they begin to run out of energy. With the Line Change option on, you can select a new line prior to every face-off or change the lines on the fly by pressing the Select Button when you have possession of the puck. You can also change or pull your goalie by pausing the game.
OFFENSIVE STRATEGIES

Finding a winning offensive strategy depends on the depth of talent on your team. Review your team roster and identify the strengths and weaknesses of every player who takes to the ice. All the players are rated according to shot and passing accuracy, shot power and stick handling. Know the difference between a strong player and a bench warmer, then pass the puck to your best shooters and take your best shot.

PASS THE PUCK

Whether it’s lining up a shot to light the lamp or keeping the puck away from a strong defense, passing is critical to winning in NHL ’95. But make sure that you keep possession of the puck. To reduce the chances of a turnover, pass only to the players you can see on the screen.

SLAP SHOTS

Slap shots can be on the mark or wildly inaccurate, depending on the shooting skills and position of the player making the shot. Increase your odds by taking a shot from just inside the blue line of the attacking zone near the right or left face-off spot.

GREAT TASTE

Most hockey fans agree that NHL ’95 was the first genuine hand-held hockey simulation in a field crowded with arcade style games, even though it didn’t include the names of the real NHL players. The scrolling graphics and missing password save option in Regular Season mode left room for some minor improvements.
DEFENSIVE STRATEGIES

Even if your roster includes the most gifted scorers in the league, your team won't climb in the league standings without a decent defensive strategy. Whether you're playing catch-up or protecting your lead, the tips listed below can help keep the puck out of your defensive zone and away from your goalie's pads.

LANE CHANGES

NHL '96 features a Line Change option that allows you to switch players on the ice prior to face-offs. If you're ahead by a comfortable margin in the third period, protect your lead by calling your Checking Line out onto the ice.

INTO THE BOARDS

Checking isn't pretty, but knocking the opposing team around can force a turnover and give your team the opportunity to take the puck into the attacking zone. If the penalty option is selected, make sure your checking is clean and fair. It takes several seconds for a player to get up and recover from a bone-jarring check.

THE PUCK STOPS HERE

Don't rely on your goalie to pull you through tight spots. Move your defenders between the puck and the goal net. The heavier the traffic in front of the net, the less likely your computer opponent will be to pull off a shot and score. If a shot is made, your team will have a good chance at forcing a turnover.

LESS FILLING

While NHL '96 doesn't overwhelm hockey fans with stunning innovations, the game does contain a few refinements over its predecessor. The animation is more fluid. The graphics are enhanced and Season mode tracks league leaders and team standings. If you don't own NHL '95, picking up NHL '96 for Game Boy is a no-brainer.
**Blues Traveler Seeks to Stop an Evil Sorcerer**

**ACT 1: THE WOODS**

Owls, caterpillars and buzz flies think Hefty is a pain in their neck of the woods. They're determined to give him a most unfriendly welcome! Be sure to get running jumps to cross the chasms.

**Up and at Em**

Getting to the first hidden area requires you to backtrack. Hop up the leaf-ladder below the owl’s nest and then onto the stump. Move quickly. The grumpy owl loves to pelt poky Smurfs with acorns!

**ACT 2: RIVER**

Hop aboard a log for a wet and wild trip! Because you can’t control your speed, you should just concentrate...

**Smurf Stuff**

- **Sarsaparilla Leaf**: Essential Smurf food. Collect 10 for an extra life.
- **Star**: Collect all five in a stage and you’ll be able to play a bonus game.
- **Key**: Defeat major enemies to win keys, which will free the Smurf prisoners.
- **Raspberry**: Boost your life meter and gain 200 points by eating one.

**Mushroom**

Sometimes these concave added power-ups are useful.

**Smurf Must Journey Through 12 Exciting Stages, Including Mountains, Swamps and a Goldmine.**

**I-Motion** has wisely tailored this side-scroller to young Smurf-Maniacs. Simple game play, a wide variety of scenery and challenges, and good use of the Super Game Boy Palette contribute to a smurfing good time!
**FOREST**

**Don't Get Stumped**
Stand on the jagged portion on top of a stump and press Down on your Control Pad to drop into a hidden area with power-ups. To return to the forest floor, jump on the trampoline.

**Get Down**
Bop the caterpillar creeping on the upper level. Continue to the end of the ledge, drop off, and return to the Mushroom below. Tap your A Button lightly to jump on the Mushroom and release the hidden Smurf Doll.

**SMURF**

on dodging the ravenous fish and the logs stuck in the current while grabbing as many power-ups as possible.

**Log Jammin'**
That ol' river just keeps rolling along. Stay to the left in order to see what's coming up, but not too far left. If you get stuck behind a log and vanish off screen, you're history! Fortunately, you can quickly slide along a log and back into the current. You'll have to get into position to grab the Smurf Doll before it appears. If you wait until you can see it, you'll probably miss it.

**ACT 3: THE BRIDGE**

Heavy rains have wiped out a bridge over the river, and the few remaining sections are none too safe! You can cross halfway by skipping over the timbers floating in the water, but at some point you'll have to hitch a ride with a bird!

**Air Cargo**
Heavier than the average Smurf, Hefty will cause a log to sink beneath the waves if he rides too long. The trick is to hop on and off quickly. To grab the first Star, which is far overhead, you'll have to make two fast jumps. Split-second timing is crucial.

**Broken Bridge**
Smurfy bridge is falling down, my fair Hefty! The weight of a single Smurf can poke big holes in the remaining bridge sections. To avoid an unexpected dip, hop, don't walk, when you're crossing.
ACT 4: THE SWAMPS
You don't have any bug repellent, so you'll have to rely on your smurf wits to get past the odd flora and fauna that infest this stage. Avoid that sinking feeling by taking to the vines hanging overhead. Once you're on dry land, you'll have to smurf a giant snake if you want to go farther!

Frog Hoppin'
When you run out of vines, wait until a frog raises its head above water level to say croak, then jump on. Take the frog route until you can grab another vine.

ACT 5: THE SARSAPARILLA FIELDS
A low ceiling cramps your jumping style in this soggy stage. Hungry spiders are spinning webs just for you, while water dripping from the ceiling drains your energy. You can hop across gaps in your path by bouncing off falling Sarsaparilla Leaves.

Bouncing Bug
If you bide your time, you can dash past these fuzzy rascals while they're bouncing the other way. Two team up to guard the fourth Star in this stage. You may have to take a hit if you want to grab the Star.

ACT 6: THE MOUNTAINS
Good thing Hefty isn't afraid of heights! He'll have to work his way up this steep slope by leaping from ledge to ledge. When he's stuck, high-altitude birds are more than happy to lend him a wing. He'll have to keep a smurfy eye out for falling rocks, broken bridges and angry bees!

Trick Trek
Soon after starting your ascent, you'll have to find a hidden passage on your left. You'll have to take it if you want to climb any higher. Later, you'll find two more areas hidden in the mountainside that contain valuable power-ups.
SMURF CITY, HERE WE COME!

Now that you’ve climbed to the top of the mountain, you’re halfway to Gargamel’s hideout, where he’s holding the three Smurf prisoners. Just because it’s downhill the rest of the way doesn’t mean your journey will get any easier. It’s time to screw your smurf courage to the sticking place!

**ACT 7:**
**THE FLIGHT ON A STORK**

Why climb all the snowy mountains when you can hitch an easy ride with a winged friend? Hold tight and use your Control Pad to elude airborne obstacles. Your stork is more than happy to peck troubles away with his long beak.

**ACT 8:**
**THE GOLDMINE**

Jump aboard a wagon for a wild underground ride. You’ll have to steer by pressing the B Button when you pass over a lever.

**ACT 9:**
**INSIDE THE VOLCANO**

You’ll have to run fast to escape the hot lava licking at your smurf shoes. Unfortunately, your hot-footed arrival has awakened one of Gargamel’s pals, a fire-breathing baby dragon. You’ll have to defeat him to win one of the keys for freeing the Smurf prisoners. Thank goodness the next stage gives you an opportunity to chill out!

**ACT 10:**
**THE SLEDGE RACE**

Grease your runners and hit the slopes! Gather speed by running over an $ icon, then jump over the yawning chasms. If you slam into a polar bear out for a mid-winter stroll, though, and you’ll lose valuable momentum. You’ll need to rack up some serious hang time if you want to grab all the Stars in this icy stage.

**ACT 11:**
**THE CLIFF**

Keep jumping as you edge along the log. If you’re standing on the log when it rolls over, you’ll find yourself on a loooong trip down! Buzzing bugs in this precipitous stage would like to like to lunch on Hefty. Is that what they call a Blue Plate Special?

**ACT 12:**
**GARGAMEL’S MANOR HOUSE**

You’re almost there, but don’t get too cocky, O.K.? Gargamel’s un-cool cat, Azrael, does your footsteps as you explore the house. He’s just waiting for you to take a fall into his waiting claws! Drop five exploding gifts on the cruel kitty’s head to turn him into litter.

**HEFTY’S NEMESES**

Gargamel has conjured up a brutal bes-teary to thwart your rescue efforts. Smurfing the giant snake, baby dragon and Azrael, not to mention ol’ Gargamel himself, takes more than a simple hop on the head. Fortunately, they’re suckers for presents, especially the exploding kind. Will that sinister sorcerer never learn?
How do you expect to finish the game if you can't get through Red-Hot Ride? Back in my day—yeah, okay, don't get antsy, I'll help you. Rise above your problems by hovering over the steam vents. Of course, some of your problems are over your head. Take the low road by speeding across the vents before your balloon gains altitude. When you finish the level, stop by the Monkey Museum and buy some of my great junk!

How do I open the Krocodile Kore?

Back already? You know, you can't get something for nothing. In my day, we knew the value of hard work. Nowadays, you kids—oh, nevermind. If you can't get the Krock's head in the Lost World open, it's because you haven't played enough of the game! To open it, you need to finish the game and complete all five of the Lost World levels, then return to the Lost World. The Krock's head will be open, allowing you to enter the Krocodile Kore. What's in the Krocodile Kore? Sheesh! Find out for yourself by playing the game. Now get out of here!
WHERE IS THE REAL THIEF?

You won't find the thief who stole Trout's treasure until nearly halfway into the game, when you reach Simafort. Look for her in the basement of Simafort when you swim there with Jean the Frog. After exposing the imposter prince, return to the basement and talk to the chefs. They'll be tired of keeping the whining thief and will gladly turn her over to you. Return the thief to Trout at his house in Hometown.

HOW DO I CURE THE QUEEN OF TUNLAN?

The Queen of Tunlan is being attacked by a nasty virus. The only way to cure her is shrink to microscopic size and engage the germs in a biological battle. After the magician shrinks your party, wander around the areas until your party is attacked. The monster icon shows if there are nearby enemies. The magician tells you when a region of the body is virus free. When you're told that a section of the body is clear, move on to the next area.

HOW DO I AWAKEN "GRANDPA" THE WHALE?

Before you can explore Tunlan, you need to find the Whale Cove and awaken Grandpa, the slumbering whale inside. Use Jean in his frog form to navigate the rivers south of Simafort and find the cove. Let Katt lead your party as you explore the pink caverns beneath the Whale Cove. Katt's staff can knock down the fence blocking the passageway leading deeper into the Whale Cove caverns. Speak with the old man in the cave, then locate and destroy Munmar, an evil statue that has put the Whale to sleep. After defeating the statue, use Katt's staff in the Whale's throat to wake him up.
**CAN I RETURN TO A PREVIOUS WORLD?**

Yes, you can, provided you've explored past World 1 and saved your game. While on the menu screen, press Up on the Control Pad until the finger cursor points to one of the numbered tabs at the top of the screen, then point to the world you want to revisit and press the A Button. If you haven't finished World 1, though, you won't be able to switch to a new world.

**HOW DO I REACH THE RING IN WORLD 2-7?**

Don't be stumped by these puzzling posts or pummeled by the Bullet Bills. You can pound down both posts at the same time by standing between them, but you need to time your jumps. A double barrel dose of Bullet Bills has you in its sights. Pound once and jump over the Bullet Bills, then pound again. If you can't jump out of the way fast enough, use Yoshi's tongue to bite the bullets. Keep repeating the pattern until the logs are down and you can reach the ring. If you're looking for a perfect score on Lakitu's Wall, pound down every post you encounter.

**HOW DO I GET PAST THE FUZZIES?**

First-time Yoshi fans find themselves floundering in flurries of Fuzzies on Yoshi's Island. Players first encounter Fuzzies in World 1-7. Touch Fuzzy, Get Dizzy. Fuzzies float around in large schools, and, no matter how many eggs you throw, you can never get rid of all of them. The trick to getting around a Fuzzy flurry is to dispose of only the ones that are about to bump into Yoshi. While you can dispose of a Fuzzy with almost any attack, the best weapon is a regular watermelon. Since it takes only one melon seed to dispatch a Fuzzy, you can conserve your seed spewing and ride out the storm with a single melon. You can also toss eggs, but you'll probably run out of ammo before the Fuzzy flurry subsides.
The Dodongo Snakes in Turtle Rock have a key, but you won’t find it unless you’re standing on the ledge above their chamber. Take a full load of bombs up onto the ledge above the snakes and drop them as they pass underneath. If your aim is true, the snakes will swallow the bombs that land in front of them. While this method requires patience, you need the Dodongo’s key to explore the maze.

The key appears in a treasure chest on a ledge above the Dodongo chamber. You need to be on the ledge before you can eliminate the snakes.

Dropping bombs on the Dodongo snakes is a lot like fishing—you never know when the snakes are going to swallow the explosive butts.

**Q & A FAST FACTS**

**SECRET OF THE STARS**

**Q:** How do I enter the town of Amaboss?
**A:** Buy Bunny Suits in Dangere and equip them on the male Aprit Minos.

**Q:** Where do I get the Blacksmith for the town of Old Hill?
**A:** Visit the town of Cod as after you have the Gyrocopter.

**Q:** Where is the Goddess?
**A:** It will be at the Architect’s House after Dan joins your party.

**DRAGON VIEW**

**Q:** Can I move the dark statues?
**A:** Yes, but only if you have a glove.

**Q:** How do I open the two locked chests in Hujia?
**A:** You can’t open them until you have found the Sukarik in the Sokra Temple.

**Q:** How do I use magic?
**A:** You need the Ice, Fire or Lightning Ring selected, then press the A Button.

**DONKEY KONG LAND**

**Q:** What are the hearts at the bottom of the screen for?
**A:** Each heart is one life credit. When you lose all your hearts, the game is over.

**Q:** Can I collect more than 20 lives?
**A:** Yes. Although the screen shows a maximum of 20 hearts, you can have more than that. If you find out what the maximum number is, let us know!
You don't need to hoist a Jolly Roger to experience swashbuckling action these days. You just need a Super NES.

Players relive the days of pirates and demigods with Acclaim's Cutthroat Island for the Super NES. This side-scrolling game follows the exploits of Morgan Adams and Shaw as they flee from the governor of Jamaica and hunt for the fabled treasure of Cutthroat Island. Playing as either Morgan or Shaw (or both in the two-player game), players wield their sabers in duels that require a quick blade and acrobatic moves. Fancy footwork can carry you forward, backward and up and down on the screen, providing something of a 3-D play field. Also, Morgan and Shaw can brawl instead of using their fencing skills, but this alternative isn't as much fun. The action takes the escaping buccaneers through a range of settings, some of which require different skills to navigate. The roller coaster ride in the quarry, for instance, requires you to memorize the obstacles lying ahead in the path. But most stages pit our heroes against an almost endless stream of fighters, some of them swing swords while others attack with guns or fists. Power-ups found along the way may help your chances for success, and you'll also have to search for hidden rooms. In addition to all of this, players can enter a treasure hunt contest sponsored by Acclaim. The winner will go on a real treasure hunt adventure in the Florida Keys. All of this may seem very exciting, but the game doesn't deliver the intensity you might expect. The emphasis on continuous swordplay may make for tedious game play. Before you walk the plank, check out the Power review this month.

Flat graphics. Some of the stages are tedious. Repetitious action. Simple enemy AI.
If you can put a ship in a bottle, you can put a pirate in a pint-sized game for Game Boy.

Cutthroat Island for Game Boy includes much of the same action as its more colorful companion for the Super NES, but it isn't an exact replica. The Game Boy version introduces new fencing moves during the course of the game. After battling through a stage, you will be taught a new move. In the following stage, the new move will prove critical to your success. The addition of new fighting moves keeps the game fresh as you progress, but the simplicity of the AI doesn't provide much of a challenge. The game also suffers from ragged graphics and the lack of any Super Game Boy enhancements. Play control also comes in on the slow side, but once you have the timing down, you can handle pretty good duels, especially after having learned a variety of moves. In addition to the enemies who come after you, bystanders may attack you with explosives. Don't miss the Game Boy review within the Super NES review in this month's Power.

- Fun theme: Introduction of new moves in game
- No Super Game Boy enhanced features, Slow play control, No Password.

Black Pearl takes another title from EA Sports and shrinks it down to size for the Game Boy and Super Game Boy.

NHL '96

Company ............Black Pearl
Release Date ........March 1996
Memory Size ..........4 Megabits

What a difference one season can make. The last Game Boy title from EA Sports and Black Pearl looked good, but moved at the speed of a glacier. NHL '96, on the other hand, skates along at far more realistic speeds but has less detail in the graphics. It was a good tradeoff. The play control and feel of NHL '96 is far superior. Shooting, passing and switching controls all work pretty much the same as in the Super NES game.

For instance, to make a slap shot, you hold the A button to build up power, then release it to take the shot. Game modes include Regular Season, Single Game, Playoffs, Seven, and Shootout. Players can adjust the time of periods, choose their own lines or have auto lines, and turn penalties on or off.

- NHL license, Lots of game modes, Quick action
- Limited, close-up view of the rink.

The Smurfs

Company ..........I Motion
Release Date ..........March 1996
Memory Size ..........2 Megabits

Cuteness rules in this smurfacious debut for Game Boy.

Hefty the Smurf has his hands full when he loses three of his smurfish buddies to the voracious Gargamel, who would love nothing so much as to snare a smurf snack. I Motion's first Game Boy title comes by way of long-time, European developer, Infogrames. As you might expect, the Smurf theme dictates a fairly simple game targeted at a young audience. The characters are large and friendly and the music bounces along. But even though this platform game is easy, it's also fun, featuring a variety of stages and skill requirements. If you love Smurfs, or know someone who is a Smurfi-aholic, The Smurfs Game Boy game may prove to be more fun than a bag.
The most popular computer puzzle game in history enters a new dimension. Tetris enters a new era on Virtual Boy in the form of 3-D Tetris from Nintendo. Instead of the flat tetrads filling in a vertical column, players now find full, 3-D blocks that must be stacked to fill a 3-D space just as in the original Tetris, once you fill a level, the blocks disappear and you score points. If you fill multiple levels at once, you’ll score even more points. Although you won’t find a two-player mode in 3-D Tetris, you will be able to play three variation modes: The Normal 3-D Tetris game can be played at 10 levels and three levels of difficulty. The Puzzle mode begins by showing you a shape constructed of tetrads, then it’s up to you to recreate from memory that same shape using selected tetrad blocks. The third mode is called Center Fill. When you create a symmetrical shape surrounding the hole and place a tetrad in the hole, you clear the level and score points. Option settings allow players to adjust the field of depth or move the camera angle during the game. Power presents a stack of strategies in this month’s review.

**Automatic saves Puzzle mode and all high scores, Can adjust settings Very challenging**

**Players won’t find it easy to spend the hours they spent on the original Tetris**

Virtual Boy burst onto the scene last August with some amazing graphic capabilities and a disappointingly small library of titles. Now, a dozen titles have been released, and the games range from sports titles such as Golf and Virtual League Baseball to full adventures such as Wario Land. This month, Power recaps all Virtual Boy titles released to date.

Power Meter .....G 3.1 P 3.9 C 3.5 T 3.3

Although the ball is a puck in this pinball game, Galactic Pinball captures the excitement of real, arcade pinball with its laser-like 3-D action. The four games feature space themes. In each game, players begin with three pucks and the goal is to keep them in play forever, or at least until the Virtual Boy tells you to take a rest.

**GOLF**

Nintendo, November 1995, 16 Megabits
Power Meter .....G 4.0 P 3.2 C 3.8 T 3.8

Golf for Virtual Boy comes to Nintendo by way of T&E Soft, a Japanese company known for outstanding golf simulations on the Super NES such as True Golf Classics: Pebble Beach. The new golf interface and engine for Virtual Boy will delight duffers with its realism. Golf turns out to be the most realistic of the first sports titles for Virtual Boy. You actually feel as if you can judge distances in this game. If there's a weakness to Golf, it's that there is only a single 18 hole golf course. Even so, there's enough challenge and variety of terrain on those 18 holes to keep golfers busy in this game for a long time to come.

**JACK BROS.**

Atlus, November 1995, 8 Megabits
Power Meter .....G 3.3 P 3.3 C 3.3 T 3.3

It's Halloween and the witching hour draws nigh for Jack Frost, Jack Lantern and Jack Skeleton—three goblins who must scamper home by the stroke of midnight. The Jack of your choice will reach home only if he beats the clock in each level, and each level may consist of three or four stages. Stages contain three or more keys for Jack to collect and several enemies to dispatch. The final stage in each level holds a guardian.

**MARIO CLASH**

Nintendo, November 1995, 8 Megabits
Power Meter .....G 3.0 P 3.4 C 2.7 T 3.0

Mario Clash borrows heavily from the early Mario Bros. arcade game in which Mario hops between three levels while avoiding koopas and other enemies. Mario Clash adds a layer of depth by creating a second layer to the play field and several pipes for passing to and from the front and back areas. Although Mario
Clash plays much like a platform game, it doesn't have much of a feeling of adventure

MARIO’S TENNIS

Nintendo, August 1995, 4 Megabits
Power Meter......G 3.2 P 3.6 C 3.4 T 3.4

The original pack-in game for Virtual Boy packs a lot of fun into its small, four megabit memory. Although the basic tennis game seems fairly simple, the presence of eight characters, each with different skill rankings, adds to the strategy factor. You can play singles or doubles as a one-player game in either Single Match or Tournament Mode with Mario, Luigi, Princess Toadstool, Yoshi, Koopa, Toad and Donkey Kong Jr. The characters may be funny, but the game requires sound tennis strategies such as mixing shots, lobbing and serving aces. The AI in the doubles match may not be as much fun as having a real partner, but it’s not bad. The greatest strength of the game is that it is easy to learn and fun to play.

NESTER’S FUNKY BOWLING

Nintendo, February 1996, 16 Megabits
Power Meter ......G 3.3 P 3.3 C 3.3 T 3.5

Nester, the obnoxious gamer of Nintendo Power fame, finally got his fondest wish by appearing in a video game. Besides Nester's cinematic antics, the bowling mechanics work like a dream, and for anyone who has ever puzzled over a bowling scorecard, all the scoring in Funky Bowling is automatic. Players can try their hand in any of three game modes, including a regular bowling game, a practice session, and a challenge mode in which you must pick up spares by taking out some of the nastiest splits you've ever seen. Two-players can take alternating turns in any of the modes.

PANIC BOMBER

Nintendo, December 1995, 4 Megabits
Power Meter ......G 3.3 P 3.6 C 3.6 T 3.1

Don’t confuse this title with Bomberman VB, which hasn’t been released in the U.S. Panic Bomber, although it comes from Hudson Soft, resembles Tetris Blast more than a Bomberman game. The idea is that you use bombs to blow up blocks and dump rubble in the opponent’s screen. Unfortunately, the opponent is the computer and not a fellow human being. Panic Bomber requires strategy and quick reflexes.

RED ALARM

Nintendo, August 1995, 8 Megabits
Power Meter ......G 3.2 P 3.5 C 3.6 T 3.5

Red Alarm immerses you in a 3-D universe where you have total control of your Toch-Wing fighter in a war to destroy a sentient machine. You can fly anywhere within the confines of each of the six stages, battling enemies, both biological and mechanical, and one major guardian at the end of each stage. The wire-frame, vector graphics convey a sense of depth in the Virtual Boy environment, but the graphics also present a few difficulties since you can’t see the solid surfaces you are about to kiss at a thousand miles per hour. Ouch. Special features in Red Alarm include custom camera angles and replay flights. It’s fun, fast and challenging.

TELERoboxer

Nintendo, August 1995, 8 Megabits
Power Meter ......G 3.3 P 3.3 C 3.6 T 3.2

Teleroboxer pits you against futuristic pugilists in a modified Punch-Out!! perspective. Your robotic or cybernetic opponent appears in front of you from the waist up while you see only your
arms and gloves in front of you. Dodging from side to side and jarring, hooking and pummeling as best you can at vulnerable points, most players will find a lot of challenge in the eight opponents. Teleboxer contains three memory save slots for recording your progress through the tournament. The 3-D effects look impressive, but the game suffers from the small stable of fighters.

**3-D TETRIS**

Nintendo, March 1996, 8 Megabits
Power Meter .....G 3.0 P 3.5 C 3.5 T 3.6

See this month’s regular Now Playing for coverage of 3-D Tetr

**VIRTUAL FORCE**

Nintendo, October 1995, 8 Megabits
Power Meter .....G 3.1 P 3.5 C 3.1 T 3.0

On the surface, Vertical Force may seem like just another space shooter, but there are really two surfaces or layers where the action takes place. As you fly along a vertically scrolling path, blasting enemy spaceships and grabbing power-up items, you’ll notice a second layer of activity below your ship. At the push of a button, you can shift your fighter down to that level, then back again to avoid a fight or to enter a new fight. It’s fun, but Vertical Force could have gone even further in using Virtual Boy’s potential for 3-D graphics and strategy.

**VIRTUAL BOY WARIO LAND**

Nintendo, November 1995, 16 Megabits
Power Meter .....G 4.3 P 3.8 C 4.4 T 4.3

Hands down the best game for Virtual Boy so far, Virtual Boy Wario Land shows off the strengths of the 3-D graphics and creates gaming situations that take advantage of the depth of field possible with the system. In four stages, players battle four major guardians and hun-

dreds of baddies who fly, swing, bounce and charge at Wario from every angle, including from the side. As in his Game Boy adventure from last year, Wario wears special hats to help him head off danger.

**VIRTUAL LEAGUE BASEBALL**

Kemco, October 1995, 8 Megabits
Power Meter .....G 2.9 P 2.9 C 3.0 T 3.0

Virtual League Baseball may not be a true virtual experience, but it turns out to be a pretty good baseball game. The league consists of 18 international teams divided into Pan American, Asian and European divisions. Virtual League Baseball was designed in Japan by Kemco. The play won't surprise video game baseball fans with its traditional behind-the-plate perspective, and the options, which include an All-Star game and Pennant Race mode, also fall into the mainstream of video baseball. In fact, the baseball mechanics of the game and the AI are fairly sophisticated.

**WATERWORLD**

Ocean, November 1995, 16 Megabits
Power Meter .....G 3.3 P 3.3 C 2.4 T 2.8

Ocean of America waded into the uncharted territory of Virtual Boy with Waterworld, a game based on last summer’s apocalyptic look at a very wet future. The designers of the game hoped to create an arcade shooter along the lines of Asteroids, and that’s exactly what Waterworld for Virtual Boy turned out to be. The asteroids have turned into Smokers on water bikes and in boats and the spaceship is Kevin Costner’s three-hulled Trimaran, but the action is basically a pivot and fire shooter. Variety? Don’t expect much. Variety is measured in the number of Smokers attacking you and the number of atollers who must be saved. Ocean spiced up the play by tossing atollers into the drink for you to rescue within a limited time. The music may be the best part of the game, and it shows that Virtual Boy sound can be full and evocative if given a chance.

The dastardly Wizard of Wolfh, three fun-loving pigs, evil minions, swords, castles, a Donut Shop and a plot to usurp the throne, all come together in Titus' wacky action game, Power Piggs of the Dark Age. Pak Watch recently received the final version of this sleeper and we were pleasantly surprised by what we saw. Although Power Piggs doesn't star a high profile hero such as Mario or Batman, it introduces three determined pigs: Gilbert, the master of invention, Lotta, a champion with the crossbow, and Bruno, their noble leader and official donut taster. Donuts play a central role in the game. The health bar consists of donuts, for example. Other special donuts can be collected for use as weapons—there's even a Homing Donut! As for skills, these pigs are prodigies. Not only do they have tremendous battle skills and the all-important Butt Slam, they also can fly given enough head wind. Hidden areas and large maps give the game extra dimension and a password feature adds to the replay value. Like Prehistoric Man before it, Power Piggs packs in the fun without all the hype and fuss of a major release. Look for Power Piggs in April along with a full blown review in the April issue of Nintendo Power.

Interaction and cooperative puzzle solving are the key words for the Game Boy version of Pocahontas from Black Pearl (a T+HQ label). Now that the game is finished, the cooperative nature truly shines. In the first area alone, Pocahontas helps a deer and a muskrat, not to mention giving a hand to her little friend, Meeko. Players can control either Meeko or Pocahontas during the game and much of the challenge comes from determining just how the two characters cooperate. It's a great idea and the game play should appeal to females and males alike, but the play control could be sharper and more intuitive, and may leave some players frustrated.

Kirby's Blockball may remind players of Breakout when they first plug in this Game Boy puzzle game, but within a few minutes Kirby shows that it is far more varied and exciting than the old classic. As it turns out, the only real similarity between Blockball and Breakout is that the goal is to destroy blocks in the play field. The means of doing this in Blockball is varied. Some blocks can be hit by the standard bouncing ball while others must be gobbled by Kirby. With the push of a button the paddles turn into Kirby trampolines that send the round guy flying into the midst of the blocks and other dangers. The action is always fast and frenzied, especially in stages with paddles on every wall. You can also enter bonus areas and games. Kirby's Blockball, due out in May, takes a classic idea into a new realm and is destined to become a classic in its own right. Kirby makes history by being the first Game Boy game to weigh in at a whopping eight megabits.
Super NES Classics

Some of the best Super NES games haven't been available for some time, but all that is going to change this spring when Nintendo re-releases six all-time bestsellers at the special suggested price of $24.99.

The titles are rumored to include Legend of Zelda: A Link to the Past, Super Mario Kart, Castlevania IV, Tetris, & Dr. Mario, Super Mario All-Star, and Sim City. All of these games were winners when first released. In fact, they were all so popular that virtually no copies remain anywhere.

The classic series of games will be identical to the games produced originally, but they will have new packaging. For players who haven't experienced the adventure of Zelda, the frantic fun of Super Mario Kart or the creative strategies of Sim City, this is a golden opportunity.

What's in the Cards?

Topps Publishing has lice the rights for a Killer Instinct collectible card game that appears in stores this April. Michi Mikaelian, one of the designers of the game, calls it a unique combat experience. The way the card game works is that the two players each choose a character and build a deck, using moves from that character's repertoire. Players will be able to match up Fulgore vs. Glacius, for example. Fans of KI will recognize the moves on the cards from the video game, but they may not recognize some of the specialty cards that cover behind-the-scenes activities at KLRU TV and Ultratech. Topps preserved some awesome rendered art from Rare that really fills out the story. Nintendo Power plans to include a complimentary Power Card for the KI card game in the April issue.

Disney Drops the Ball

Disappointment rained on our parade here at Pak Watch recently when we learned from Disney Interactive that two of their Super NES titles have been canceled and one delayed until the fall. Gargoyles fell victim to soggy sales predictions precipitated upon the poor performance of Genesis Gargoyles sales. DI execs failed to note that the Super NES currently dominates the entire video game market. Pocahontas also fell into the abyss of corporate cutting, partially due to concerns about potential sales and partially due to concerns about the quality of the game, which isn't even finished. At Pak Watch, we applaud DI's commitment to quality and their refusal to release a product that they feel doesn't make the grade. On the other hand, it's disappointing that the company didn't go ahead and correct the flaws in the game. The biggest disappointment may be the delay of Maui Mallard. This could be one of the top Super NES games of 1996, but DI has decided to market the game this fall when the PlayStation version of Maui comes out and 16-bit games will be competing even more directly with the next generation platforms than they are now. So, will we ever see Maui Mallard for the Super NES? Unfortunately, we can only guess that we may never see this one, either, and that's a shame, because Maui is an excellent game that deserves better than to wind up on the corporate cutting room floor.

Flea For Your Life

Gametek had to scratch the dog a few times to find this game, which was developed by a German company called Haus Teknikka. The Euro-platform game, copyrighted in 1994, looks and sounds a bit dated and features some of the weirdest game play we've ever seen. The hero of Frantic Flea is a large flea who must collect and rescue his extended family of small fleas, who are being threatened by an assortment of ridiculous enemies. The vertically and horizontally scrolling screens are filled with traps and brilliant colors that help disguise them. The flea hero attacks his enemies by launching himself into a whirling flea frenzy, which proves to be one of the more awkward attack modes we've ever seen. Stomping on enemies will simply get you squashed. Gametek will probably release this game in April, if you feel the itch, play it.
If you love puzzle games, Pak Watch has good news, great news, incredible news for you. A Japanese game called Panel De Pon from Nintendo will take on a new look for the Super NES and appear in North America this spring, probably in May. The original game was aimed at young female players and featured winged fairies as the characters beyond the play field. In the U.S., the game will feature Yoshi and will be targeted at a wide range of puzzle players. But the appearance of the game is almost immaterial. The play is everything. The Panel play field fills up with blocks of different colors that can be moved sideways. The trick is to line up three or more blocks vertically or horizontally to cause them to disappear. Although this sounds simple, the strategies for moving blocks can be complex and the play is captivating. The game will contain regular timed matches, two-player vs. matches, and a puzzle mode in which players can learn much of the intricacies of this deceptive game.

GAME BOY SLAM

College Slam for Game Boy may seem like another NBA Jam without the stars, but the action on the court has come a long way. Torus Games, the developer, did a great job of incorporating speed and play control into this diminutive hoopster. It feels great. Slam includes the following modes: Practice, Head-to-Head (one player), Semi Final, Tournament, and Season match-up. The Super NES version may have the color, but this version packs all of the other features. You should be able to take this one with you starting next month.

TOY ON BOY

Last month we showed off the first pics of Toy Story for Game Boy. Now, we have a working version, although it isn't 100% complete. The two most striking aspects of the game at this stage are the graphics, which look remarkably like those of the Super NES game, and the play control, which has all the speed and maneuverability of an ice berg. The first stage is almost identical to the Super NES game, but at this early stage doesn't feel much like it. We'll keep you posted as this pack grows up.

VOLUME 82
Nintendo Power linked up with Genyo Takeda of Nintendo Co., Ltd., who is in many ways the unsung father of the Nintendo 64 video game system. Since the early days of Project Reality, Mr. Takeda, as the General Manager of Research & Development 3 at NCL, has overseen the design of the new system taking place in Japan and at Silicon Graphics Inc. in California. In the past, Mr. Takeda has directed the development of hardware and software projects for Nintendo. His credits include Nintendo's coin-op video game systems and the Punch-Out!! series of Nintendo games. At NOA headquarters in Redmond, Washington, we sat down with Takeda-san to ask him about his role in the development of the most advanced video game system in the world. His candid responses illuminated much of the design philosophy behind the development of the new hardware and the writable disk drive accessory.

Power: Can you describe how the 64DD works and why it is a better memory storage system than CD-ROM?
Takeda: First of all, I want to point out that 64DD isn't the final name for our bulk storage device. It is just descriptive of the Nintendo 64 Disk Drive. We are going to use a magnetic storage medium because it is recordable. Nintendo has been looking for a storage medium for many years. We looked at CD-ROM, but it has some disadvantages. It is read-only memory, and that is the biggest disadvantage. So we decided to look at other methods. Since Nintendo is going with cartridge-based games, we don't necessarily need the size of storage you get with CD-ROM. We also asked Mr. Miyamoto what was really needed for game development and he wanted memory that was writable. And when it comes to the memory size of the DD, it is 65 megabytes. Of the 65 megabytes, about 20 megabytes will be writable by the player in a game. This also gives a lot of memory to game developers.

When we first looked at CD-ROM and filling up all that space, we said, well, let's make it like a movie. But in my understanding, the most important part of a video game is that developers come up with good ideas that give players new experiences in spite of the graphics. Excellent graphics may add to the game, but you must have a good idea first. Lots of memory space can be filled up without making a good game. Game Boy is a good example. You have limited graphics and yet there are some excellent games.

Power: What part of Nintendo 64 performance impresses you the most?
Takeda: I think there is something graceful and natural about the graphics and motion of the Nintendo 64. Using lots of polygons is not the most important thing. The fine texture mapping makes a bigger difference in realistic looking worlds. I think that Super Mario 64 is a good example. It has very natural graphics, and that includes the movement. The Nintendo 64 is so precise, it can control every pixel. Another example is scaling. On the machines from Sega and Sony, if they scale up or scale down, it's not a smooth transition. Adults may understand what's going on, but from a child's perspective, they wonder why this happens when in reality if you look closely at something it is a smooth transition.

Power: What was the most difficult part of developing the system?
Takeda: The most difficult part was limiting the cost. Most people equate lots of transistors and components with cutting edge technology, but we have very few chips but very good technology. It surprises people.

Power: What other projects are in the works for the Nintendo 64, such as a modem, for instance?
Takeda: It's a little too early to talk about a network, but the reason we selected the 64DD with its writable capability is that it can be used in networking in the future.

Power: How was the experience of working with Silicon Graphics Inc.?
Takeda: SGI and Nintendo were joint partners. Their background was totally different from ours. They had experience building very expensive, high speed graphics workstations for specialized users while Nintendo knew how to make affordable home video game systems for everyone. These are two very different things, and we had the limit of $250 to work with. So we educated them and they educated us. The first thing they asked was what is the most important thing
for video games. We asked our most experienced people to explain their needs to SGI. Mr. Miyamoto and others talked to their engineers from a game design perspective. It was a difficult gap to bridge, but everyone was excited about the project and it went very well.

**Power:** What is your favorite game of all time?

**Takeda:** My favorite game, probably, was a game I made myself in those days, back in the 70s after college, you could write code in machine language and one person could create an entire game. When I tell my people in R&D 3 about this today, I think they are envious, because today it takes so many people to make a game. It is so specialized: you are an artist or you are a programmer or you are a designer, but you don’t do everything.

**Power:** What was the underlying philosophy or goal for the Nintendo 64?

**Takeda:** I think we have a very flexible machine. We have two ways to deliver software with cartridges and the disk drive, depending on the needs of the game. We are also thinking of expanding the memory of the system. There is a memory slot here on the top of the machine where we can add extra RAM. This is the first home video game system with the possibility of expanding. With this and the 64DD, I think the Nintendo 64 will adapt to the changing requirements of game designers in the future.

**SPECIAL UPDATE**

**NOA ANNOUNCES 64-BIT NAME AND RELEASE CHANGES**

The long awaited announcement of the release date of Nintendo's new 64-bit video game system in North America has finally been made. Nintendo of America will launch the Nintendo 64 on September 30th, 1996, several months after the official launch in Japan this April. The reason for the different release dates between North America and Japan has to do with production capacity and the expected high demand for the system. In order to avoid shortages at launch, Nintendo has decided to pursue a staggered release schedule. It became apparent after the unveiling of the Nintendo 64 at Shoshinkai last November that the system would be met with huge demand by consumers wanting the best in video game entertainment. One survey estimated that the Nintendo 64 will sell more than three million units this year in Japan alone.

Nintendo of America also announced that the Nintendo Ultra 64 name would be changed officially to Nintendo 64, which is the name of the system in Japan. The name and logo change for the Nintendo 64 is intended to reduce confusion by giving the system one name and one identity around the world. The Nintendo 64 design, including the color of the console and controllers, will be uniform around the world, as well.

The writable magnetic disk drive (with the preliminary name of 64DD) is scheduled to be unveiled this fall at Shoshinkai. The 65 Megabyte storage device will be bundled with a 1 or 2 Megabyte expansion RAM pack that plugs into the N64's unique memory expansion slot to enhance the memory capacity of both magnetic disks and Game Paks.

Although the launch of the Nintendo 64 will occur later than originally planned, North American consumers will benefit from the availability of a larger library of games. An estimated eight to 12 exclusive Nintendo 64 games from Nintendo and its Dream Team members will be released by the end of 1996. In all, over 30 games are currently in development. The bottom line is this: the Nintendo 64 is worth the wait.

**VOLUME 82**
Between Star Wars and Return of the Jedi, a new story is about to unfold on the Nintendo 64. Shadows of the Empire from Nintendo and LucasArts features interstellar graphics, hyper-spatial play and a dark, twisting plot that pierces the shadows of the Empire's most sinister criminal cartel. Next month, the development team behind the game gives you an insider's perspective on the incredible power of the N64.

The world famous cream puff is back, bouncing off the walls and breaking down barriers in Kirby's Blockball, an arcade-style puzzler for Game Boy.

Nothing can ruin your day quite like a wolf in damsel's clothing. Check out Power Pigs of the Dark Ages, a hilarious side-scroller from Titus.

If you're tired of waiting in line to play Killer Instinct 2, perhaps it's time to adopt a winning game plan. Next month's issue features the best KI 2 arcade secrets and strategies used by the pros. Read up on their cool moves and combos, then take control and dominate.

Our goal is to try and preserve classic videogame magazines from years gone by before they are lost forever.

Thanks goes out to all the people who make this possible. From the original editors and writers, to everyone involved in acquiring and digitizing these magazines.

People interested in helping us out, in whatever way possible. Either by donating classic magazines, scanning, editing or distributing them, visit us at http://www.retromags.com

We are only interested in preserving classic magazines that are at least 5 years out of print.

We have no desire or intention to profit from these in any way. So please, if you come across people trying to sell these releases, don't support them!

Thank You and ENJOY!
